GENERAL ANALYSIS

Major Federal-State Flood Control Projects—Department of Water Resources

Chapters 1, 2, 3, and 4 of Part 6, Division 6 of the State Water Code provide that the State will pay for lands and relocation of improvements in connection with federal flood control projects which have been adopted and authorized by the Legislature.

This reallocation schedule provides for the continuation of 11 currently authorized projects and 1 project in Riverside County requiring funds for the first time.

It is not expected that all work on projects proposed for 1963-64 will be completed during that year. In order to more accurately reflect the proper expenditure level for the Budget Year, $4,042,691 of the appropriation is limited to expenditure only during the 1964-65 fiscal year.

---

[a] Expenditures from bond funds not included in budget totals.

[b] A working revolving fund. Neither the revenue nor expenditures included in budget total.

SUBVENTIONS FOR RESOURCES—Continued

Flood Control—Continued

GENERAL ANALYSIS—Continued

Watershed Protection Projects—Department of Water Resources

This program is known as Public Law 566, Act of 1954 (amended by Public Law 1018, Eighty-fourth Congress, Second Session, 1956) entitled "Watershed Protection and Flood Protection Act of 1954." The act provides for the construction of works of improvement for the purposes of flood prevention and the agricultural phases of conservation, development, utilization, and disposal of water. In any watershed or subwatershed areas the projects shall be limited to 250,000 acres and shall not include structures having a capacity of more than 5,000 acre-feet for flood prevention, or a capacity of more than 25,000 acre-feet for all purposes. This group of 9 projects represents those which are administered at the federal level by the Department of Agriculture. One project at Walnut Creek is based on the Public Law 46 Pilot Plant Program while the remaining group is based on subsequent legislation.

Small Flood Control Projects—Department of Water Resources

Section 205 of the Flood Control Act of 1948 as amended authorizes the Secretary of the Army to allot from appropriations heretofore or hereafter made for flood control not to exceed $25,000,000 in any one fiscal year, for the entire United States, for the construction of small flood control projects not specifically authorized by Congress, provided that not more than $1,000,000 be allotted for this purpose at any single locality from the appropriations for any one fiscal year.

Sacramento-San Joaquin River Drainage Basin Projects—Reclamation Board

Through the State Reclamation Board, the State co-operates with the Federal Government in the construction of flood control projects in the Sacramento-San Joaquin River drainage basin. The extent of state participation is determined by the several acts adopting and approving specific projects and for which appropriations to meet the State's cost are made as necessary. Generally such participation consists of the acquisition of rights-of-way, easements, flowage rights, and the cost of replacement or relocation of permanent improvements as necessitated by the construction of the flood control works, except that on the Sacramento River Bank Protection projects a contribution toward construction cost is required.

The 1963-64 Budget proposes a continuation of the Sacramento River Bank Protection Project, the completion of the Sacramento River Flood Control Project, the Lower San Joaquin River Project, the Calaveras River and Littlejohn Creek and Tributaries Project, and the completion of the Middle Creek Flood Control Project.

Total expenditures for 1962-63 are estimated to be $7,729,169, of which $4,464,369 are prior year appropriations. The appropriations for 1963-64 are proposed in the total amount of $4,510,922. In addition, $2,899,200 is available for expenditure from prior appropriation.

GENERAL ANALYSIS

Beach erosion control in California is the responsibility of the Department of Water Resources as defined in Sections 330 to 339, inclusive, of the Water Code which provides for study of beach erosion problems, co-operation with all federal, state, and local agencies in planning and construction within the availability of funds. It is further provided that it is the policy of the State to bear one-half of the costs of local public agency participation required by authorized federal projects, including construction costs and costs of lands, easements, and rights-of-way. Advances by the State for the federal share of the cost of beach erosion control projects is permitted under Section 338 of the Water Code. Such advances are considered as loans and are returned to the State upon completion of a project or a severable portion of a project.

Advances for the federal share of each project are increased in 1963-64 to reflect provisions of Public Law 87-874, Rivers and Harbors Act of 1962. As interpreted, Public Law 87-874 increases the federal share of the construction costs of authorized projects on public owned lands from one-third to one-half by Section 103(a)(1). By the same law, Section 103(a)(2), the federal share of construction costs for projects within parks or conservation areas has been increased from one-third to 70 percent.

GENERAL ANALYSIS

The Division of Small Craft Harbors and the Small Craft Harbors Commission were created by Division 5.7 of Part 1, Public Resources Code. The powers of the division are exercised by the chief of the division acting under the supervision and direction of the Director of Parks and Recreation. The commission establishes the general policies. The division has as part of its mission the program of developing small craft harbors and maintaining or improving the waterways of the State. At the present time, the agency is functioning in the area of assistance to cities, counties, or harbor districts in the planning of small boat harbors and waterways development. The assistance may be in the form of engineering advice, surveys, and site inspection. During the final planning stages in which preliminary plans are developed into contract plans and specifications this assistance would take the form of planning loans and engineering consultation. The agency may also provide construction loans to those local jurisdictions that can properly qualify. Financial assistance to local jurisdictions whether for planning or construction is on a loan basis.

As a part of the long-range program, it is contemplated that the division will also construct harbor of refuge facilities as state developments in areas where the need is great and where complete development of the project is beyond the financial capability of a local agency. The first phase of an estimated $4,000,000 harbor project at Shelter Cove in Humboldt County was provided by Chapter 1875, Statutes of 1959. This program is reported in the Capital Outlay section of this budget. Although other harbors of refuge have been proposed, the commission considers that Shelter Cove should be developed first because of its location. Other suggested harbor of refuge areas are to be planned following completion of a study as to areas of need.

The Small Craft Harbors Commission has been authorized to make expenditures from any funds available from the sale of bonds authorized by the Harbor Development Bond Law of 1958. It is provided in this law that loans might be made to cities, cities and counties, counties, and districts having power to acquire, construct, and operate small craft harbors. While the bonds which are authorized by this law are general obligation bonds, it was contemplated that they would be self-liquidating.

By a recent amendment to the Public Resources Code, the Small Craft Harbors Commission is empowered to make grants to cities, counties or districts for the construction and development of small craft launching facilities. A proposed program for such grants in the current and budget years is included in this budget.

FEASIBILITY AND PLANNING STUDY LOANS

Section 5827 of the Public Resources Code authorizes the Division of Small Craft Harbors to make planning loans to cities, counties, or districts having power to acquire, construct and operate small craft harbors. Such loans as are made must be repaid within 10 years and repayment must include a charge estimated to equal the revenue which the State would have derived by investing the total deferred payment at the interest rate prevailing for legal state investments.

The 1963-64 fiscal year proposes the continuation of the planning loan program. It is estimated that approximately $75,000 in loan requests will be received by the Commission in 1963-64.

LAUNCHING FACILITIES GRANTS

Section 5865 of the Public Resources Code authorizes the Small Craft Harbors Commission to make grants from the Small Craft Harbor Revolving Fund to cities, counties, or districts for construction and development of small craft launching facilities. These grants are to be made in areas of greatest public recreational boating need and for projects which will not be constructed other than by such a grant or by other state agencies.

It is estimated that approximately $250,000 in grant requests will be received by the Commission in Fiscal Year 1963-64.

SMALL CRAFT HARBOR CONSTRUCTION LOANS[b]

Section 5827 of the Public Resources Code authorizes the Division of Small Craft Harbors to make construction loans to cities, counties, or districts having power to acquire, construct, and operate small craft harbors. The division may loan money for acquisition, construction, improvement, maintenance, or operation of small craft harbors and related facilities. In addition, the division may concern itself with connecting waterways. The division is charged with the responsibility of determining that a project is feasible. The commission functions as the policy body in establishing the policies and standards to be used in making loans.

A brief statement of the present policies and standards follows:

1. All planning shall have been completed and copies of such plans and reports submitted to the division for approval.
2. The feasibility study shall indicate a favorable benefit-cost ratio.
3. All property to be used in connection with the project shall be owned or fully controlled by the requesting public agency; or an agreement-to-sell by the owner at a stated reasonable price shall be obtained prior to final approval of the loan.
4. A repayment agreement approved by the governing body of the requesting public agency shall be submitted with the application indicating the proposed method of loan repayment.
5. If the loan does not cover the entire cost of the project, a financing plan shall be submitted indicating sources of construction funds other than the loan being applied for, and the proposed method of retiring the loan and meeting other financial obligations of the project.
6. An operating plan shall be submitted indicating how the harbor will be operated and maintained on completion of construction.
7. Personnel of the division will inspect periodically the construction area to check on progress and to discuss the work with the local agency's inspection staff.

Section 5882 of the Public Resources Code provides that the Legislature shall make a specific appropriation of funds allocated from the Small Craft Harbor Revolving Fund for any authorized purpose with the exception of planning loans. The program reported herein does not require specific appropriation as it is furnished from a $5,000,000 appropriation from the California Water Fund made by Item 421.5, Budget Act of 1958. In addition to the state funds, federal and local funds will be used to meet the total estimated costs. In addition, allocations are also anticipated from the Small Craft Harbor Bond Fund. Bond sales of $10,000,000 from this fund have been executed. This represents the total authorized by the Harbor Development Bond Law of 1958.

OTHER HARBOR PROJECTS

The Budget Session of 1962 allocated $325,000 for the Division of Small Craft Harbors in co-operation with the Federal Government for the construction of a harbor of refuge at Noyo. This construction is to be carried on with the Noyo Harbor District acting as principal.

Inasmuch as a complete harbor development cannot be carried on without federal funds, the $325,000 budgeted for the 1963-64 fiscal year cannot be expended until the federal funds are available for the 1963-64 fiscal year, and therefore, the $325,000 appropriated during the 1962-63 fiscal year will be expended during the 1963-64 fiscal year.

Noyo Harbor, Noyo Harbor District *(Small Craft Harbor Revolving Fund)* Construction of a harbor of refuge at Noyo Harbor in co-operation with the Federal Government.	–	–	$325,000

The Martinez Small Craft Harbor project has not been completed as planned and developed under previous legislative authority for construction loans. The Budget Session of 1961, provided under Item 412.5 a sum of $450,000 payable from the Small Craft Harbor Revolving Fund for the development and improvement of the incomplete small craft harbor at Martinez.

LOAN FOR HARBOR OF REFUGE CONSTRUCTION BY DIVISION OF SMALL CRAFT HARBORS

Section 5823 of the Public Resources Code authorizes the Division of Small Craft Harbors to "prepare plans for, and acquire, construct, develop, and improve, small craft harbors, facilities in connection therewith, and connecting waterways." It is contemplated that this authorization will be used only when there is no local responsible agency to construct and operate a harbor, and where the need is great from the standpoint of safety. Such harbors are commonly known as harbors of refuge.

In the 1963-64 fiscal year the agency proposes execution of the initial phase of an estimated $4,000,000 harbor project at Shelter Cove in Humboldt County. This project was approved by Chapter 1875, Statutes of 1959. Shelter Cove is 39 nautical miles north of the Noyo River and 54 miles south of Humboldt Bay. The cove lies under the southern face of Point Delgada and affords some shelter in northwesterly weather, but the cove is exposed and dangerous with south and west winds. Landings can be made with caution in favorable weather on the single beach along the northern shore of the cove. A county road connects with U.S. Highway 101 at Garberville, 24 miles east. A county airstrip is located on the point and plans have been made for improving and lengthening the present runway. Limited supply facilities are in existence at Shelter Cove to provide for the demands of transient craft using the cove.

The legislation requires that construction funds for this project be made available in the amount of $460,000 contingent upon the execution of an agreement that the County of Humboldt will take over the Shelter Cove project within a 3-year period. The county is to assume total responsibility of maintenance, operation and further development of this harbor project on the date the total amount appropriated is expended, or at the termination date of the availability of the appropriation, whichever is earlier. The agreement will provide for the repayment by the County of Humboldt of the money expended by the State, such repayment to start not more than 6 years from the date the money is expended, or from the termination date of the availability of the appropriation, whichever is earlier, including interest at 3 percent, and extending not more than 20 years from said earlier date.

GENERAL ANALYSIS

State bond sale proceeds are available as provided in the Harbor Development Bond Law of 1958. It is provided in this law that loans might be made to cities, cities and counties, counties, and districts having power to acquire, construct, and operate small craft harbors. While the bonds which are autho ized by this law are general obligation bonds it was contem plated that the bonds would be self-liquidating.

Grants to Soil Conservation Districts			
TOTAL EXPENDITURES (General Fund)	$152,987	$100,000	$100,000

GENERAL ANALYSIS

Section 9063.1 of the Public Resources Code authorizes the State Soil Conservation Commission to make grants within appropriated funds to soil conservation districts, organized pursuant to Division 9 of the Public Resources Code to assist such districts in carrying out any work they are authorized to undertake whenever the commission determines that such work is necessary for the welfare of the people of the State.

The projects must advance the conservation, use and management of soil and water resources on croplands, forests, range and watershed lands within soil conservation districts.

The projects fall within the following general categories:

CONSTRUCTION	$90,084	$51,686	$36,301
Projects consist of channel realignment and lining, riprap of stream banks, construction of drainage facilities and miscellaneous other construction and planting projects.			
PLANNING	53,803	47,000	50,599
Grants are made to districts for preliminary plans prior to actual construction of projects. In many areas studies are made to determine the feasibility of a project.			
DEMONSTRATION	–	–	2,500
The basic justification for the project is to illustrate proper methods in soil conservation work.			
INVESTIGATION	9,100	1,000	10,600
Grants made in this area are for the testing of sections of ditch banks and types of grasses for growth and spraying to remove objectionable growths.			
Grants to Soil Conservation Districts	$152,987	$99,686	$100,000
Unallocated	–	314	–

Salaries of Superior Court Judges

	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64	CHANGE FROM 1962-63
TOTAL EXPENDITURES *(General Fund)*	$3,758,740	$3,952,000	$3,962,000	$10,000 (0.3%)

GENERAL ANALYSIS

Under the provisions of Section 68206 of the Government Code, the State contributes toward the salary of each judge of the superior courts in accordance with the population of the county as determined by Section 68207 of the Government Code.

The amount budgeted is to provide the State's share of salaries of the 335 judges in 1962-63 and 1963-64 authorized by existing law.

Included in the total is 1 authorized position not yet established in San Joaquin County which is contingent upon action of the board of supervisors as provided by Section 69598 of the Government Code.

The following statement shows the contribution by the State and by the county toward the salary of each judge as provided under Section 68202 of the Government Code:

Population of county	*State share*	*County share*	*Total salary*
250,000 or more	$11,500	$9,500	$21,000
100,000 or more but less than 250,000	13,500	7,500	21,000
More than 40,000 but less than 100,000	11,400	7,500	18,900
40,000 or less	13,400	5,500	18,900

TOTAL EXPENDITURES *(General Fund)*	$303,007	$456,960	$456,960	

GENERAL ANALYSIS

Under the provisions of Section 75101 of the Government Code, the State contributes to the Judges' Retirement Fund an amount equal to 4 percent of the salary for each of the established judgeships of the superior and municipal courts. The rate was increased from 2½ percent to 4 percent by Chapter 62, Statutes of 1962, First Extraordinary Session. Provision is made for contributions relating to 335 superior court judgeships and 240 judges of the municipal courts, all of which have been authorized by law for the current year.

RECONCILIATION WITH APPROPRIATIONS

General Fund	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64	CHANGE FROM 1962-63

TOTAL EXPENDITURES *(General Fund)*	$500,000	$500,000	$500,000	

GENERAL ANALYSIS

Pursuant to Sections 970-973 of the Military and Veterans Code, the State may reimburse the counties for part of the cost of county services maintained for assistance to veterans and the dependents of deceased veterans in presenting and pursuing such claims as the veterans may have against the United States arising out of war service and in establishing the veteran's right to any privilege, preference, care or compensation provided for by the laws of the United States or of this State. The amount paid each county, conditioned upon the observance of certain standards and regulations, is determined by the California Veterans' Board except that the payment toward the salary of the county service officer shall not exceed $75 per month. Payments are also made for partial cost of assistants' salaries and operating expenses.

The 1963-64 Budget continues the same level of expenditures as authorized for 1962-63. This provides sufficient funds for all counties to participate in the program if they so desire.

TOTAL EXPENDITURES *(General Fund)*	$169,769	$171,001	$177,600	$6,599 (3.9%)

GENERAL ANALYSIS

To secure more adequate and uniform enforcement of the provisions of the Agricultural Code, the State participates in the payment of salaries of the county agricultural commissioners as provided by Section 63.5 of the Agricultural Code. Participation is limited to the lesser of $3,300 per year or two-thirds of the salary of each commissioner. Fifty-two counties are participating in this program with an indication that 2 more counties may sign contracts. Variation in amounts between years is the result of changing salaries paid commissioners by the various counties.

TOTAL EXPENDITURES *(Peace Officers' Training Fund)*	$449,601	$489,750	$535,238	$45,488 (9.3%)

GENERAL ANALYSIS

In accordance with Chapter 1823, Statutes of 1959, allocations of moneys collected from a 5 percent assessment on criminal fines will be made to those cities and counties which adhere to standards for recruitment and training established by the Commission on Peace Officers' Standards and Training. State participation is restricted to an amount, not to exceed 50 percent of salaries and wages, and expenses of those officers meeting the standards and participating in training, and is contingent upon the amounts available in the Peace Officers' Training Fund.

There are currently 434 jurisdictions identified as having law enforcement organizations subject to enforcement standardization. At the end of fiscal year 1961-62 there were 281 jurisdictions eligible for state assistance. From fiscal year 1959-60 through fiscal year 1961-62 approximately 2,279 peace officers had been trained under this program. During 1962-63 it is estimated that 1,880 officers will participate in the Basic Recruit Course and in 1963-64 about 1,970 will participate.

The support expenditures and fund statement are shown on page 483 of the state operations section of the budget.

Assistance to Counties for Prosecution and Conduct of Homicide Trials

GENERAL ANALYSIS

In accordance with the provisions of Sections 15200 through 15204 of the Government Code, the State may reimburse counties for that portion of the cost of prosecuting and conducting homicide trials that exceeds the tax money derived by the county in excess of 10 cents on each $100 on the property assessed for purposes of taxation within the county.

Costs incurred by the county in the trial or trials can include costs incurred by the district attorney in investigation and prosecution, by the sheriff in investigation, and all other costs incurred by the county in connection with the trial including witness fees and expenses, reporter fees, and costs in preparing transcripts.

The Director of Finance is charged with the responsibility of determining if the county meets the prescribed conditions, the authority to grant funds for this purpose, and the authority to establish rules and regulations to carry out the law.

This program was established by Chapter 2115, Statutes of 1961 which included an appropriation of $35,000 from the General Fund for 1961-62. There have been no expenditures incurred under this appropriation. Because of the contingent nature of this program future expenditures are proposed to be financed from the Emergency Fund should they occur.

TOTAL LOANS (*School Land Fund*)[1]	–	$350,000	–

GENERAL ANALYSIS

Financial assistance to counties for the construction of jails can be provided under the Local Agency Allocation Law, State Allocation Board, from funds in the State School Land Fund not dedicated to the support of public schools.

Under this program moneys can be made available only if the county does not have a jail meeting minimum standards for jail construction promulgated by the Board of Corrections and the financial resources of the county are such as to warrant state assistance.

If funds are allocated to a county, the Controller transfers to the School Land Fund each payment due to the county under Section 25761 of the Business and Professions Code, until there has been deducted an amount equal to the allocation for construction together with interest not to exceed 3½ percent annually.

No expenditures are anticipated for this purpose in the budget year.

APPROPRIATIONS			
Budget Act appropriation (Loan) [1]	–	$350,000	–

Housing Improvement and Development

TOTAL EXPENDITURES *(General Fund)*	–	–	$2,000,000

GENERAL ANALYSIS

Subject to the passage of legislation a housing improvement and development program is proposed to meet the housing needs of the State's expanding population. This appropriation will permit state interest guarantees to assist in filling a void in financing of housing for low income groups. It will be administered by the Local Allocations Division, Department of Finance. In a limited capacity this program will stimulate low income housing construction and thereby provide better housing at a lower purchase price or rental cost. A further discussion of the program is included in the support budget of the Department of Finance, Local Allocations Division.

Totals	—$82,978	$1,643,159	—$23,831

GENERAL ANALYSIS

FLOOD RELIEF LAW OF 1956: Chapter 9, Statutes of 1956 (First Extraordinary Session) appropriated $24,900,000; $14,500,000 from the General Fund and $10,400,000 from the State Lands Act Fund. The amount appropriated from the General Fund was subject to allocation by the State Public Works Board to provide assistance to local agencies, including any city, city and county, county, or public district, for repair and restoration of public property damaged or destroyed by storm and flood during the months of December 1955 and January and February 1956. The amount appropriated from the State Lands Act Fund was for loans to local agencies for the completion of any of the repair projects for which the agencies were unable to meet their share of the cost. The 1957 Legislature appropriated an additional $1,200,000 from the General Fund to complete the financing of the program and the 1958 Legislature extended the availability of the appropriation until June 30, 1960. To date the General Fund appropriation has been encumbered to the extent of $13,964,559 and the State Lands Act Fund appropriation to the extent of $190,863. While all unexpended balances have been reverted in accordance with Section 16304.1 of the Government Code, encumbrances of $456,147 against the General Fund appropriation still remains, the liquidation of which will require a reversal of the reversion to that extent or an additional appropriation.

Chapter 2039, Statutes of 1961, appropriated an additional $40,000 from the General Fund to complete the financing of 1 delayed project in the City of Santa Cruz under the program inasmuch as the appropriation under Chapter 9 was no longer available for the purpose. This program has been completed at a cost of $29,845.

FLOOD RELIEF FOR 1958, 1960 AND 1962: Item 446.7 of the Budget Act of 1958 appropriated $15,000,000 from the California Water Fund to provide financial assistance to local agencies for the repair and restoration of public real property damaged by storm or flood during the period between January 1, 1958 and July 1, 1958. The 1959 Legislature extended the availability of the appropriation to June 30, 1960 and the 1960 Legislature further extended the appropriation without regard to fiscal years and made it available to provide financial assistance to local agencies to repair storm damage occurring between January 1, 1960 and July 1, 1960, as well as to complete the 1958 program. In 1961 the Legislature further amended the legislation to make the appropriation available to provide financial assistance to local agencies to repair storm damage occurring between November 1, 1961 and July 1, 1962. To date, commitments incurred or to be incurred are estimated at $6,840,000 for the 1958 repair program, $1,760,000 for the 1960 program, and $1,800,000 for the 1962 program; which amounts, it is believed, will be sufficient to complete the programs.

Provision is made in the budget to extend the availability of funds to provide financial assistance to local public agencies to repair home damage occurring between October 1, 1962 and December 31, 1962. To date claims for $1,027,375 have been received for this period.

Airport Assistance

TOTAL EXPENDITURES *(Airport Assistance Fund)*	$332,762	$352,238	$344,594

GENERAL ANALYSIS

Section 8352 of the Revenue and Taxation Code creates the Airport Assistance Fund through a continuing appropriation of $350,000 per year from the Motor Vehicle Fuel Fund. The Public Utilities Code at Section 21681 provides that $15,000 of this amount is available for the support of the Division of Aeronautics, Department of Public Works, for the division's activities in connection with administration of the fund. The balance is available for grants to cities, counties and airport districts for airport and aviation purposes. The Public Utilities Code at Section 21682, provides for a maximum grant of $2,500 for each airport, and conditioning this grant on matching funds being provided for the same purposes by the local government. Any remaining balance in the fund may be expended in accordance with Section 21684 by making allocations to cities, counties and airport districts for the acquisition and development of airports. Any unused portion of the $15,000 which is set aside each year for administration by Section 21681 of the Public Utilities Code is available in the succeeding year to increase the amount available for grants to local governments under Section 21682 et seq.

Planning Grants for Local Jurisdictions				
TOTAL EXPENDITURES *(Federal funds)* [a]	$290,296	$377,385	$452,860	$75,475 (20%)

GENERAL ANALYSIS

This program provides for federal assistance to state and local governments in solving planning problems resulting from the increasing concentration of population in metropolitan and urban areas. The grants are designed to facilitate comprehensive planning for urban development on a continuing basis by such governments, and to encourage the establishment and improvement of adequate planning staffs.

Federal grants made under this program generally represent two-thirds of the estimated cost of the work for which the grant is made. The balance of the cost is borne by the local communities.

The initial application for assistance is made to the State Office of Planning, which in turn applies to the Federal Government for the grant on behalf of local jurisdictions. Upon approval of the program by the Federal Government, the State Office of Planning enters into a contract for the planning grant. The State then enters into contracts with the city (or county) and its chosen planning consultant for completion of the approved planning program.

CLASSIFICATION OF FUNDS IN THE STATE TREASURY

The budget totals of revenues and expenditures reflect the activities of many separate funds. See Schedule 5 for complete list of these funds. They are segregated into the following classifications:

GENERAL FUND—Consists of money received into the State Treasury not required by law to be credited to any other fund, to be used for general purposes of State Government.

SPECIAL FUNDS—Funds created to receive certain revenues or to finance particular activities which are for general purposes of State Government or are for activities subject to the regulatory or police powers of the State.

OTHER FUNDS—See Schedule 5 for list of funds which are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. There are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. Funds not included in the budget totals are segregated into the following classifications:

Working Capital and Revolving Funds—Funds created to finance services for governmental agencies for which charges are made at cost to maintain a fixed accountability. The charges are reflected as expenditures in the budget at the agency receiving the commodity or service.

Public Service Enterprise Funds—Activities operated under state control for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues. These functions are not subject to the regulatory or police powers of the State.

Bond Funds—To hold proceeds from the sale of bonds and to finance projects for which the bonds were authorized. The Legislature may create the General Obligation Bond Proceeds Fund into which the proceeds from the sale of all bonds may be deposited. The cost to the State is charged at the time interest payments are made and when the bonds are redeemed. (See Treasury Funds for which no detailed transactions are reported in the budget.)

Retirement Funds—Moneys held in trust by the State for retirement benefit payments.

Debt Service Funds—Moneys held by the State to be used for payment of interest or for redemption of bonds.

Trust and Agency Funds—Funds holding moneys in trust pending disbursement to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

TREASURY FUNDS FOR WHICH NO DETAILED TRANSACTIONS ARE REPORTED IN THE BUDGET

Ballot Paper Revolving Fund: The fund is used by the Secretary of State to purchase paper for sale to counties and municipalities for their use for election ballots.

Old Age and Survivors Insurance Revolving Fund: The fund is used by the State Employees' Retirement System to clear employer and employee contributions under the Federal Old Age and Survivors Insurance Program from public agencies included in the agreement between the State and the Federal Government.

Opportunity Work Centers Revolving Fund: Provides for purchase and rental of equipment for Blind Centers.

State Payroll Revolving Fund: The fund is used by the State Controller for payment of salaries through the Central Payroll System.

India Basin Sinking Fund: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Fund No. 4: Receives money from the proceeds of bond sales to be used for the construction of wharves, piers, seawall, and other improvements in San Francisco Harbor.

San Francisco Seawall Fund No. 5: Receives money from the proceeds of bond sales to be used for the construction of wharves, piers, seawall, and other improvements in San Francisco Harbor.

San Francisco Seawall Sinking Fund No. 2: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Sinking Fund No. 3: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Sinking Fund No. 4: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

Toll Bridge Authority Revolving Fund: A permanent revolving fund to pay expenses incurred by the California Toll Bridge Authority in the administration of the Toll Bridge Authority Act.

Condemnation Deposits Fund: Contains deposits held in trust pending settlement of court cases in condemnation proceedings.

School Land Fund: A nonexpendable endowment fund for public school purposes. Revenues consist of payment of principal and purchase price on sale of school lands. The interest received on the investment of this fund is deposited in the School Fund.

Special Deposit Fund: Accumulation of numerous trust funds deposited by state and private agencies for a specific purpose. This fund also contains unclaimed checks and deposits pending either payment to the proper persons or transfer to the General Fund. The transactions of this fund are so numerous and so indefinite that no attempt is made to estimate the volume that will flow through the fund.

State Park Contingent Fund: Receives moneys from gifts, bequests, from municipal or county appropriations, or donations, for improvements, additions, or administration of the state park system. The amounts received are disbursed in accordance with the provisions of the donations.

Surplus Money Investment Fund: Excess money in those funds which do not have other provision for investment may be transferred to this fund, the pooled resources are invested and the interest earned is prorated to the contributing funds.

Tax-deeded Land Rental Trust Fund: Receipts are derived from leases made by the State Controller covering property deeded to the State for taxes. The rentals are paid semiannually to the county in which the property is located for distribution to the taxing agencies.

Treasury Trust Deposits: Provides for the State Treasurer's Central Banking System.

Unclaimed Property Fund: This fund accounts for all unclaimed moneys held by the State.

GENERAL ANALYSIS

Objectives

The Correctional Industries program of the Department of Corrections was established to provide a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment in order that they might be returned to free society as useful citizens. This program plays a significant role in the elimination of inmate idleness which would otherwise contribute to the causes of both mental and physical degeneration. Work projects for this program are selected to contribute to the rehabilitation of prisoners with minimum competition with private industry and free labor.

Program and Performance

The Correctional Industries Commission, representing organized labor, industry, agriculture, and the general public, is the policymaking body for this activity. It is empowered to recommend productive industrial and agricultural enterprises for the prisons. This includes determining the advisability and suitability of establishing, expanding, diminishing, or discontinuing any industrial or agricultural enterprise involving a gross annual production of not more than the maximum determined by the formula established by the Legislature.

The program is administered by a central office headquarters staff under the general direction of the general manager of correctional industries.

The Correctional Industries program includes 26 industrial and 19 agricultural enterprises which have been established in all the correctional institutions of the department except the Conservation Center, Medical Facility, and Rehabilitation Center. About 3,375 inmates or approximately 12.6 percent of the total prison population will be employed during the 1963-64 fiscal year. Activities include industrial operations such as the license plate factory at Folsom, the cotton textile mill at San Quentin, and the sewing enterprise at the Institution for Women at Frontera.

A shoe enterprise was activated during the early months of 1962 at the California Men's Colony and is producing men's shoes for the wards of the State confined in the various institutions.

Equipment is being installed in the knitting mill also at the California Men's Colony. Hosiery and tubular knit goods for subsequent conversion into tee shirts and other knit garments will be produced by this enterprise. It is anticipated that this industry will begin actual production during the latter part of 1962. Approximately 160 inmates will be employed in this industry.

Research and design of new products in the office furniture and clothing lines is continuing following the wide acceptance of modernized lines produced during the past year. The further use of metals and some plastics is contemplated in keeping with style trends.

More than 23 million, 10-year (permanent) 1963 motor vehicle license plates have been completed at Folsom. These were delivered to the Department of Motor Vehicles prior to November 30, 1962. Five correctional officer positions were abolished and approximately 200 inmates made idle as a result of the completion of this work.

In 1963-64, $1,030,000 will be transferred from Correctional Industries Revolving Fund surplus to the General Fund. Of this amount, $530,000 will offset the proposal for the construction of a new industries warehouse at Folsom.

Combined sales and transfer values of products resulting from the employment of inmates in this work program totalled $8,467,303 during the 1961-62 fiscal year. The major portion of all items produced are used or consumed by wards of the State. The remainder is sold to other tax supported governmental agencies.

New positions for 1963-64 are proposed as follows:

Correctional Institution at Tehachapi—One storekeeper and 0.1 temporary help for vacation relief for the storekeeper to properly maintain and control increased products and materials. These positions were established administratively in 1962-63.

Correctional Training Facility—One correctional officer (truck driver) for increased milk and other products delivery; 1 temporary help blanket for maintenance of factories and equipment; 1 storekeeper to control and warehouse goods created by increased production; and 1 textile products and 1 educational products foreman for increased production in these activities. With the exception of the 1 storekeeper, the above positions were administratively authorized in 1962-63 based on need because of increased volume.

Deuel Vocational Institution—One correctional officer (truck driver) for delivery of increased milk production and other materials; and 1 dairyman to aid in caring for the increased herd and its production.

State Prison at Folsom—One orchardman to care for the newly planted peach orchard to assure production for canning at this institution. This position was established administratively in 1962-63 along with 1.5 temporary help blanket to handle a temporary increase in production demands.

Men's Colony—One temporary help blanket for the various industries to meet temporarily increased production loads and provide vacation relief for production positions; and 3 shoe factory foremen to provide the supervisory production personnel for the newly established shoe industry. Seven-tenths temporary help blanket and 1 shoe factory foreman were established in 1962-63 to provide sufficient production coverage for the initiation of the shoe factory and to meet the production demands.

State Prison at San Quentin—One assistant to the industries administrator to perform a portion of the increasing administrative functions caused by industry and production growth; 1 storekeeper for the control and warehousing of increased goods and materials caused by increased production; 2 correctional officers for custody of the newly created 2nd production shift at the cotton textile mill; and 1 detergent plant superintendent based upon an increase in detergent production. All the above positions were administratively established in 1962-63, based on increased demands in these areas. Other administrative adjustments include the abolishment of 1.5 correctional officers in the current year and an additional 0.5 correctional officer in 1963-64 at the naval renovation plant as this service will no longer be performed at this institution.

Institution for Women—One storekeeper to perform the overall storekeeping function formerly performed by an inmate. The establishment of a civil service position will eliminate this undesirable practice.

GENERAL ANALYSIS

Objectives

The Inmate Welfare Fund, established by Section 5006 of the Penal Code in 1945, is a trust fund held in the State Treasury and administered by the Director of Corrections for the benefit, education, and welfare of inmates in institutions under the jurisdiction of the Department of Corrections.

Program and Performance

The primary source of revenue for the fund is profits from the sale of items to inmates at canteens maintained in each institution under the Department of Corrections. Other revenue is derived from sale of handicraft items, donations, and other miscellaneous sources. Funds so received are deposited in the State Treasury and allotted to the various institutions through departmental budgetary procedures. These allotments provide funds for the operation of the canteens and hobby shops and for the purchase of athletic and recreational equipment and supplies such as books, television sets, small games, and rental of motion picture films.

The gross revenue for the Inmate Welfare Fund is in excess of $2,000,000 annually. Of this revenue, an estimated 91.6 percent is used in operating the canteens, handicraft shops, and meeting administrative expenses. The remaining 8.4 percent is available for the recreation and welfare of the inmates including the purchase and repair of television sets, film rentals, fiction books for the libraries, all athletic and recreational supplies not a part of the organized athletic or education program, and the cost of the inmate newspaper. The current major program of the Inmate Welfare Fund is the establishment of the initial complements of merchandise, personnel, supplies, and equipment at the Conservation Center, the Conservation Center Branch at Chino, and the Rehabilitation Center.

Workload and administrative adjustments during 1962-63 include the establishment of 1 storekeeper position at the Men's Colony—East Facility, and 0.6 temporary help at Tehachapi for the fund's accounting.

A total of 3.8 proposed new positions is included in the 1963-64 fiscal year. These include a canteen manager and an accounting technician to staff the Conservation Center Southern Branch, the continuation of the administratively established storekeeper for the Men's Colony—East Facility and the 0.6 of a position of temporary help for accounting services at Correctional Institution at Tehachapi, plus a 0.2 temporary help for the canteen at Correctional Training Facility—North Facility.

INDUSTRIES FOR THE BLIND MANUFACTURING FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

The Industries for the Blind operates 3 subsidized production centers located at Berkeley, Los Angeles, and San Diego. These centers offer factory employment to blind, partially sighted, and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases and other textile items, surgical wrappers, rugs, brushes, plastic articles, and rubber mats constitutes the main production program together with the fabrication and assembly of many products on a subcontract basis.

The administrative and physical plant operating expenses are a direct charge against the General Fund and manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of products are deposited. For many years, these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong central administration to co-ordinate the activities of the centers and provide adequate administrative control over the program.

The program is administered by a central office headquarters staff under the general direction of the Chief, Division of Special Schools and Services of the Department of Education.

During the 1961-62 fiscal year, 213 persons or 188 full-time equivalent blind or otherwise physically handicapped workers were employed in the 3 centers, and the payroll for these workers was $427,747. The program for 1963-64 is based on the employment of 298 persons or 256 full-time equivalent workers with a payroll of $549,881.

Sales of the 3 centers amounted to $2,420,215 and the cost of goods sold including salaries and wages and other adjustments totaled $2,419,055. This reflects a small gain of $1,160 in the manufacturing operations in the 1961-62 fiscal year. However, $116,179 was paid for pro rata general fiscal charges in the 1961-62 fiscal year. This charge had never been previously paid by the fund and represented payment for the 4-year period from 1958-59 to 1961-62.

The financial transactions of the Industries for the Blind Manufacturing Fund, excluding administrative costs borne by the General Fund, are summarized in the table below. For comparison purposes, the payment for pro rata general fiscal charges is not included in the costs of the manufacturing operations.

Summary of Operations

	1957-58	1958-59	1959-60	1960-61	1961-62	Change from prior year
Sales	$2,549,908	$2,725,234	$2,129,846	$2,226,195	$2,420,215	$194,020
Total wages paid to blind and handicapped workers	540,177	566,834	467,431	397,376	427,747	30,371
Total other operating costs	1,941,442	1,948,772	1,735,223	1,878,836	1,991,308	112,472
Net Profit	$68,289	$209,628	—$72,808	—$50,017	$1,160	$51,177

A marketing survey, completed under the direction of a management consulting firm, recommended a change in the marketing program with increased emphasis on commercial outlets and subcontract work. Sales and marketing specialists have recently been employed to further the sales program and carry out the recommendations of the survey. Quality control supervisors employed during 1961-62 have resulted in improved quality of the products produced by the centers and better management control of factors affecting the pricing structure of manufactured products. These and other management actions are directed to a more economical program in terms of state support and to a better opportunity for the blind workers to have steady productive employment at a reasonable rate of compensation.

At the Los Angeles Center an administrative assistant and supporting clerk are proposed in the 1963-64 fiscal year to provide for better control of orders, subcontracts and the procurement of raw materials. In addition, a supervisor of brush manufacture is proposed to supervise the enlarged brush-making operation at this center. The administrative assistant and the brush supervisor have been established administratively in 1962-63. The budget also reflects the abolishment effective July 1, 1962, of 2 foreman positions because of a consolidation of job assignments.

Support *(Surplus Property Revolving Fund)*	$2,678,483	$2,799,650	$2,868,217	$68,567 (2.4%)
Personnel man-years	241.7	248.2	248.2	–

GENERAL ANALYSIS

Objectives

The State Educational Agency for Surplus Property is authorized by Sections 451 to 457 of the Education Code to co-operate with the Federal Government and its agencies in securing federal surplus property, including surplus foods, for distribution to eligible institutions.

Program and Performance

Surplus property of all federal agencies is made available to schools and other eligible institutions through this agency. All expenses of procuring, handling and distributing such property are paid by the agency and recovered by nominal service charges. Any excess service charges are refunded to the participating agencies after the close of each fiscal year. Reserves are maintained to meet any unliquidated obligations.

The increasing importance of this agency's operations is indicated by the following tabulation:

Year	*Fair value of property distributed*
1953-54	$12,590,511
1954-55	13,983,511
1955-56	17,083,736
1956-57	20,216,696
1957-58	21,656,349
1958-59	27,928,933
1959-60	33,123,054
1960-61	30,984,884
1961-62	32,615,369
1962-63 (estimated)	34,000,000
1963-64 (estimated)	34,000,000

The level of expenditures budgeted for the agency is determined by the availability of surplus hardware and food, as well as requests from interested participating agencies. In general terms, the work program includes the screening of available property; warehousing that which is received; processing and repairing where required; and distributing and checking for compliance. The work force required increases or decreases in proportion to the workload as measured in terms of service and handling charges made. Such change is shown in the following table, with the number of positions given being equivalent full-time positions, including temporary help and overtime:

Year	*Service and handling charge*	*Service charges as a percent of fair value*	*Work force*	*Average service charge per man-year*
1953-54	$1,331,252	10.6	113.2	$11,760
1954-55	1,424,388	10.2	124.6	11,432
1955-56	1,749,657	10.2	149.4	11,711
1956-57	2,010,665	9.9	178.5	11,264
1957-58	2,478,197	11.4	193.2	12,828
1958-59	3,084,890	11.0	208.2	14,817
1959-60	2,849,551	8.6	225.7	12,626
1960-61	2,886,850	9.3	242.1	11,924
1961-62	3,089,672	9.5	241.7	12,783
1962-63 (est.)	3,100,000	9.1	248.2	12,490
1963-64 (est.)	3,100,000	9.1	248.2	12,490

A leveling of the program and a consolidation of workload assignments permits a reduction of 19 positions effective with the 1962-63 fiscal year.

GENERAL ANALYSIS

Objectives

The Department of Finance through the Service Revolving Fund provides a variety of services to State agencies. These services include operation of an automotive pool; purchasing and distribution of supplies; printing and reproduction of various types of materials; and maintenance and repair of communication equipment, office machines and automotive equipment.

Program and Performance

All these services are financed by charges to the using agencies on a nonprofit basis. Supplemental financing from the General Fund is used to provide the initial equipment and inventories and subsequent additions to them necessary for the operations of the various functions.

As of June 30, 1963 the budget proposes the reversion of those funds available for augmentation from previous appropriation. Total operations for the 1963-64 fiscal year will then require an augmentation of $1,173,208 after utilizing surpluses which are available from operations.

In order to provide the most economical and efficient services to state agencies in 7 general service areas, the following divisions of this fund have been established:

PRINTING DIVISION

This division produces the necessary printing for state agencies and the Legislature, manufactures textbooks for public schools, operates the Legislative Bill Room, and operates a Documents Section where sales are made of state documents. The Documents Section also distributes material required under the Library Distribution Act.

This division produces printing for the State estimated at a savings of approximately 30%. An authorization of $576,060 is required for additional equipment to modernize and speed the processing of legislative and agency material. This equipment is a portion of that recommended by the subcommittee on printing of the Joint Committee on Legislative Organization, and can be justified on the basis of a prompt return on investment. Prime examples are the web offset press which will recoup a $300,000 investment in less than four years, and realize a savings over present operating cost of $70,000 for each succeeding year. Teletype setting equipment proposed in this budget will reduce cost from $2.25 per thousand ems of type to $1.00. It will permit typesetting of legislative bills directly from the Capitol Building at a substantial reduction in printing time.

An industrial engineer position is proposed to provide continuing studies within the Printing Plant to insure the most proficient and economical operation. An assistant supervisor of printing and planning services has been administratively established in the current year and is proposed for continuation in the budget year for workload purposes.

CENTRAL STORES

By stocking supplies commonly used by several State agencies, lower unit costs are realized through a large volume of purchases. Warehouses are operated in Sacramento, San Francisco and Los Angeles.

It is proposed to increase the inventory in the amount of $175,000 to stock items not now carried in stores. Sales of these items will amount to approximately $550,000 a year resulting in a savings to the State of approximately $82,000 a year.

The transition of requisition workload from manual review to data processing is estimated to produce savings of two clerical positions. The savings will be passed on to the using agencies by the reduced overhead cost of service. One proposed new position is provided to initiate a property reutilization section in Los Angeles and to handle increasing workload in the new warehouse activity in that city.

STATE GARAGES

The automotive pool provides efficient use of automobiles resulting in low cost to the State and State agencies. Garages are maintained in Fresno, Los Angeles, Oakland, Sacramento, Berkeley and San Francisco. Automotive pool services are provided at 5 metropolitan airports. The section also provides an airplane for transportation into areas not having airline service and for emergency use.

	1961-62	1962-63	1963-64
Cars on hand on July 1	2,291	2,494	2,552
Purchase of cars	406	424	494
Transfers from other agencies	130	–	–
Sale of cars	—333	—366	—396
Net increase	203	58	98
Cars on hand on June 30	2,494	2,552	2,650
Mileage	35,918,730	37,700,000	39,600,000
Average mileage per car	14,402	14,773	14,943

The temporary help allotment has been reduced in both the current and budget years by the equivalent of 1 man-year based on past requirements.

One position in Los Angeles and 2 in Sacramento were established temporarily to wash cars in lieu of contracting for this work. Savings produced in this program justify the establishment of these positions on a permanent basis. Three additional mechanics will be required in Los Angeles in 1963-64 to repair and maintain the increasing number of cars belonging to the pool and to other State agencies. A garage attendant in Fresno and 1 in San Francisco will be required to properly serve State agencies and to prevent traffic congestion on the streets near the garages.

Provision is made for acquiring an executive airplane to be operated in conjunction with the automotive pool.

RADIO MAINTENANCE

This unit operates 40 radio maintenance shops at various locations throughout the State. Engineering service is provided to all State agencies having radio equipment. The systems of the Highway Patrol, Disaster Office, Department of Justice, Department of Correction, Youth Authority, State Colleges and the Resources Agency are composed of 8,050 units of radio equipment. In 1963-64 5 additional technicians will be required to service additional units which will be installed by them. Various State agencies, particularly Highway Patrol and Forestry are installing new communication systems and modifying the old systems. This requires considerable engineering; and the current backlog of such work and the anticipated workload require 3 additional communications engineers.

OFFICE MACHINE REPAIR

This unit provides preventive maintenance, overhaul and repair services in Sacramento for approximately 8,600 state-owned typewriters, adding machines and calculators. Two positions are proposed to service adding machines and calculators not serviced by the State.

Provision is made in this budget for the establishment of office machine repair units in San Francisco and Los Angeles. These units will be opened early in 1964 and will require a capital investment of $17,700 for equipment and inventories. This investment will be recovered in the first six months of operation by charging agencies approximately what they are now paying for similar service. The charges will drop substantially after 6 months of operation.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

RENTED BUILDINGS

The Department of Finance leases a building in Santa Ana which it has sublet to State agencies.

REPRODUCTION

This section makes available duplicating service to all State agencies in the Sacramento area. One proposed new position is provided and 1.5 positions are anticipated to be transferred from other agencies using these services. Additional positions will be transferred from other agencies to operate a second Sacramento unit as the using agencies avail themselves of this service.

Totals	$24,198	$25,842	$25,175	—$667 (—2.6%)

GENERAL ANALYSIS

Objectives

The Soil Conservation Development Fund was created by Chapter 1032, Statutes of 1949, as amended, with an appropriation of $1,000,000 to provide for the acquisition of soil conservation machinery, equipment, and buildings and rental thereof to soil conservation districts. Section 12.2 of the Budget Act of 1958 returned $400,000 of this amount to the General Fund in 1957-58 as the full amount was no longer required for operation of the fund. The fund is administered by the State Soil Conservation Commission.

Program and Performance

Equipment requests are investigated to determine whether there is appropriate need, to select suitable types, prepare purchase specifications, receive deliveries of equipment, and regularly inspect the operation and maintenance of equipment.

During recent years, federal surplus equipment has been available to soil conservation districts and the purchase of equipment for districts with state funds has decreased in volume. Loans are now made primarily for reconditioning and modifying the surplus equipment to adapt it for soil conservation use.

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The Division of Architecture's basic assignment is to plan, design, and supervise construction of state building projects. It is the central architectural and engineering service for the State Government. In addition, it approves for safety the plans and construction of all public school building projects.

By law, the division serves as clients all state departments and agencies except the University of California, the San Francisco Port Authority, the Department of Water Resources and (since July 1, 1961) the California State Colleges. The Trustees of the California State Colleges have, however, entered into an agreement with the Department of Public Works by which a major part of the architectural services for the colleges will be obtained from the division during an initial 3-year period.

In addition, the division provides a variety of related services, such as architectural and master planning consulting services at four state college campuses and at all state institutions; surveys of potential sites and preparation of site suitability reports; all phases of construction contract administration; minor construction; repair and alteration projects; and special architectural and engineering investigations.

General Process—Construction projects, in written program form, originate in the several state agencies and are submitted to Department of Finance for consideration for inclusion in the Capital Outlay budget. After approval by the Department of Finance each project is then transmitted to the Division of Architecture. The division then prepares for the client agency preliminary plans, outline specifications and estimates of cost for the proposed major and minor construction projects. These documents form the basis for a request to the Legislature for appropriation and project authorization.

Upon passage of the Budget Bill by the Legislature, and its signature by the Governor, and after specific authorization by the State Public Works Board, working drawings and specifications and final construction estimates of cost are prepared and the project advertised for construction bids. Award of contract to the successful bidder, pursuant to the requirements of the State Contract Act, initiates the final phase of the division's responsibility.

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, with approval by the Department of Finance and the State Personnel Board, he may contract with qualified architects and engineers for the performance of the work (Section 14101, Government Code). No contracts of this nature are anticipated in the 1963-64 fiscal year.

The capital outlay program estimates were the best available at the time of budget preparation. However, to the extent that the amount of actual authorized building projects assigned to the division may vary above or below estimates, the funds available to the division are increased or decreased accordingly.

The Architecture Revolving Fund Budget is presented in three major programs: Preliminary planning; contract working drawings; and supervision of construction. Management and general administration costs are distributed to these three programs.

Preliminary Planning—The preparation of plans and specifications and estimates of cost form the basis for requests to the Legislature for appropriations in the capital outlay section of the budget.

Preliminary planning also includes preparation of preliminary plans, specifications, and estimates for projects financed under continuing appropriations rather than annual authorizations on the Budget Act.

Additionally, this program includes such special projects as architectural consulting and master planning services and a large volume of surveys, reports, and recommendations on suitability and feasibility of sites and other studies.

Contract Working Drawings—The preparation of drawings, specifications and estimates of cost for advertising and contracting by the division and also the preparation of similar documents for advertising and contracting by other agencies, such as the Federal Government, Division of Beaches and Parks.

Supervision of Construction—Continuous, full-time inspection of projects under construction to insure conformity with plans and specifications.

1963-64 Architecture Revolving Fund Program

The reorganization of the division and the establishment of a new control system, implementing a comprehensive management study, showed major benefits in the past year.

On the basis of the revised program and considering the effects of reorganization and increased efficiency, the division had reduced its estimate of positions required for the current year by 92 positions previously budgeted and approved. The reduction is carried through in the 1963-64 budget request.

Evaluation of the 1963-64 program must necessarily be made on the 3 separate portions of the total program in which the division is actively participating, all within a single budget year. During any particular year the division is actively preparing: (1) preliminary planning for projects to be included in the budget in the succeeding year; (2) contract drawings and documents for projects previously approved by the Legislature, the funds for which became available during the current year; and (3) supervising construction of projects approved in both preceding and current years.

PROGRAM SUMMARY	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

ADMINISTRATION

PROGRAM SUMMARY

A pro rata share of the management and general administration expense of divisional activities, including operating expenses, is distributed to each of the 3 major programs. Included in this area are the executive positions of the State Architect and the deputy chiefs in the fields of administrative and technical services; the Project Management Service, responsible for authorizing projects, co-ordinating requirements and solutions with client agencies and the Department of Finance scheduling and timing the projects according to statewide priority; and support personnel in the fields of administration office services, accounting, contracts, personnel functions, secretarial services, public relations, management analysis, training safety, and central files.

Prorated to supervision of construction	*(502,878)*	*(537,489)*	*(543,372)*

PRELIMINARY PLANNING

PROGRAM SUMMARY

A. *Preliminary Planning*

Preliminary planning is the initial phase of the program involving participation in a project by the division. After the basic needs of a state agency are presented in a written program and approved by the Department of Finance, the division proceeds with architectural and engineering studies based on the approved criteria. During the course of the initial planning, and upon completion of the preliminary plans, meetings are held with the client agencies and Department of Finance to obtain approval of the preliminary plans and specifications.

The ultimate product in the preliminary planning program is a package consisting of preliminary plans, outline specifications and estimates of cost for the proposed project.

This package, signed by authorized representatives of the using agency, is transmitted to the Budget Division, Department of Finance, for incorporation in the Capital Outlay portion of the budget. It is the defined scope of the project which will be the basis of the contract drawings if the project is funded by the Legislature.

In the current fiscal year the division is preparing preliminary plans, outline specifications and budget estimates, based on requests from the Department of Finance and from the Trustees of the California State Colleges for projects thus far valued at $35,846,635. This amount is not static but increases as new requests are received from the Department of Finance and special fund agencies. Based on the five-year projection of the Department of Finance as to needed facilities and upon the resolution by the Trustees of the California State Colleges that 60 percent of new work will be assigned to the division, the division is anticipating in the current year an additional $30-$35 million workload in preliminary planning. These are the projects which may, or may not, be included in the budget for funding in the 1963-64 fiscal year. The division is also currently updating preliminary plans on projects valued at $58,864,634 already approved by the Legislature in the past session before proceeding with working drawings.

The workload of the division in the preliminary planning phase for the budget year cannot be predicted at this time. Using the report to the Joint Legislative Budget Committee titled "State Building Construction Programs, July 1, 1962-June 30 1967," prepared by the Department of Finance, as a general guide, and adding projects prepared for budget submission for previous years and not yet funded, the preliminary planning workload for the budget year is projected at roughly $107,900,000. However, it is at the discretion of the Trustees of the California State Colleges as to what portion of the state college preliminary plans (nearly half of the total) will be assigned to the division during 1963-64. For budget forecast purposes, a continuation for 1963-64 of about the same level of basic preliminary planning work from all sources, including state college work is assumed.

B. *Special Projects*

A large portion of the preliminary planning program is involved in the preparation of reports and recommendations for site suitability and condemnation through physical inspections research, and engineering surveys. Billing for division services is made directly to the requesting agencies. It is anticipated that the demand for this type of work by the division's technical staff will remain at the same level level during the budget year.

WORKING DRAWINGS

PROGRAM SUMMARY

Work Within the Division

That portion of the total program devoted to the preparation of contract documents, including construction drawings, specifications and estimates of cost, is defined as the Working Drawing Program. The extent of such documents is indicated by Section 14270, Government Code, a portion of the State Contract Act.

Working drawings are initiated only upon specific authority as indicated by the appropriation in the Budget Bill and specifically authorized by subsequent action of the State Public Works Board. Work in this phase involves responsibilities by the technical units of architectural design; architectural drafting; landscape architecture; mechanical, electrical, structural, civil and sanitary engineering; specification writing; and cost estimating.

The division prepares its construction working drawings for segregated bidding whenever the contract cost is in excess of $300,000 and when several major groupings of work, such as general, mechanical, electrical, etc., are clearly indicated. Bids

---

DIVISION OF ARCHITECTURE—Continued

PROGRAM SUMMARY	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

WORKING DRAWINGS—Continued

PROGRAM SUMMARY—Continued

Work Within the Division—Continued

are also invited on a combine basis on these projects. Segregated bidding results in lower total construction costs, frequently amounting to as much as 5 percent below the combined bid.

Also included in the Working Drawing Program is the necessary work that must be performed after award of the contract in the area of checking shop drawings submitted by contractors; reviewing and taking action on submittal of materials for approval; field inspections to co-ordinate intent of drawings with construction progress; issuance of change orders; interpreting and clarifying intent of documents; negotiating and resolving quotations from contractors of change ordered items.

The division in the past year advertised for bids on projects with a value of $67,721,068. Also fully completed, but not advertised, were another $13,040,249 of projects pending availability of funds or completion of site acquisition, for a total of $80,761,317 completed projects. In the current year, it is anticipated that a project value of $91,462,474 will be accomplished.

In the budget year, the division anticipates a total available workload of $125.9 million assuming the same proportion of work assignment to the division from the Trustees of the California State Colleges.

No increase in total budgeted positions is contemplated.

Working Drawing Program by Private Architects

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, the director may contract, with the approval of the Department of Finance and the State Personnel Board, with qualified architects and engineers for the performance of the work. (Section 14101, Government Code.)

Even under this program it is the responsibility of the division personnel to perform all work for a project under the preliminary planning phase prior to inclusion in the budget, including site investigation and preparation of preliminary plans, specifications and estimates of cost.

Also under this program the division provides substantial review and checking of contract drawings prepared by private architects before requesting bids as well as substantial review of shop drawings and material submittals after award of contracts. Issuance of change orders during the progress of construction is also executed by the division personnel, as well as the entire program of supervision of construction.

The division's responsibility in connection with private architect work discussed herein refers only to those projects contracted by the Department of Public Works. The division's responsibility with respect to state college work contracted to private architects by the trustees is undetermined at this time.

The division in the past year advertised for bids on projects by private architects with a value of 1.5 million. The division did not use private architects in the current year and does not anticipate their use in 1963-64.

PROGRAM EXPENDITURES DETAIL

Working drawings by Division of Architecture personnel	$5,604,488	$6,017,428	$5,897,730
Progress payments to private architects under contract	$31,592	$132,633	$9,000

SUPERVISION OF CONSTRUCTION

"The State Architect shall have an inspector at each building during the whole time of its construction" (Government Code Section 14100). Under this portion of the total program, resident inspectors of the number required by the size and type of project are assigned to supervise construction. The chief responsibilities are to insure construction in full conformance to the contract plans and specifications; to co-ordinate work, work schedule and work areas among separate contractors and subcontractors; to interpret and resolve inquiries from contractors; to determine and evaluate actual progress made on construction and to prepare progress payment estimates; to make periodic and final inspection of workmanship and materials; to recommend final acceptance of project; to keep records of overrun of contract time at completion of construction for determination and justification of liquidated damages; to perform reinspection prior to expiration of guarantees.

Conformity of construction with the requirements of the plans and specifications is more than a contractual requirement demanded by the State. It also assures the safety, usability and proper functioning of the project as designed by specialized professionals in their separate fields. In addition, it is an obligation to the State to assure fairness to successful and unsuccessful bidders alike by enforcing compliance with plans, specifications, and all related items of the contract documents.

As of October 1, 1962, the division had a total of $128,400,000 contracts in force for which annual disbursements will total $85,000,000 (estimated).

The defeat of the State Construction Bonds in June, 1962, had the effect of preventing projects completed in planning from getting into construction. As a result, the contracts which will be in force for the budget year will increase to $140 million and annual disbursements will total an estimated $90 million.

Included in the workload for the budget year is the construction supervision and contract administration by the division of $10,202,000 worth of projects assigned by the Trustees of the California State Colleges to private architects for the preparation of plans and specifications.

The division does not contemplate an increase in the present budgeted positions for supervision of construction. The division will attempt to absorb the increased workload by careful utilization of inspection personnel, through job-grouping and controls, while maintaining the quality of construction supervision.

PROGRAM EXPENDITURES DETAIL

Supervision of construction	$2,342,574	$2,409,278	$2,412,382

CONSTRUCTION OF PROJECTS (DIRECT)

PROGRAM SUMMARY

The State Contract Act provides that all projects shall be done under the contract awarded to the lowest responsible bidder, except that it may be done by days' labor under direction of the Department of Public Works under certain specified situations, some of which are:

1. In case of emergency due to damage to a state-owned building or any other state-owned real property or improvements located thereon by an act of God.
2. At any time after approval of plans, specifications, estimates of cost, if the director deems the advertising or award of a contract, the acceptance of any bid, or the acceptance of any further bids after the rejection of all submitted bids is not to the best interest of the State.

It is the policy to contract for the performance of construction and improvement projects wherever it is feasible to do so rather than to use day labor under force account or to use civil service maintenance crews.

Department of Public Works

DIVISION OF ARCHITECTURE—Continued

PROGRAM SUMMARY	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

CONSTRUCTION OF PROJECTS (DIRECT)—Continued

PROGRAM SUMMARY—Continued

Generally the use of day labor is limited to the following situations:

1. When there is a clear showing that a particular project cannot be accomplished by contract at a reasonable cost to the State because contractors do not appear interested in the project and where there is an urgent need for the project.
2. Improvement or repair work to be done in an area where prisoners are being confined or where mental patients are being cared for, making it necessary to have workmen under state control.
3. Minor construction in a remote location where neither contractors nor skilled labor is available.
4. Projects affected by conditions of site or existing structures where it is impracticable to define the details of work with sufficient accuracy to permit competitive bidding.
5. Work which is useful for vocational training at certain state colleges.
6. Historical landmarks restoration projects.

Almost all of the projects that fall into these categories are minor construction projects wherein participation by the division is requested on a current basis. During the past year the division accomplished $462,672 worth of restoration projects, $1,212,902 other projects, for a total of $1,675,574 on day labor construction. During the current year, as well as the budget year, it is estimated that work accomplished by day labor forces will approximate $1,800,000.

CONSTRUCTION OF PROJECTS (CONTRACT)

PROGRAM SUMMARY

For the purposes of construction supervision, the State is divided into 3 areas as follows:

Area I with headquarters in Oakland comprises the northern coastal area extending from King City to Arcata.

Area II with headquarters in Sacramento comprises the central valley area, extending from Porterville to the Oregon line and to the Nevada line.

Area III with headquarters in Los Angeles comprises the Southern California area.

The amount of contract construction of projects in force is currently $128,400,000 for which progress payments are disbursed at the rate of $85,000,000 annually. The workload in October 1962, was distributed to the 3 areas as follows:

Area I	$28,735,077
Area II	42,227,641
Area III	57,476,424

It is anticipated that the amount of construction in force for the budget year will average approximately $140,000,000 at any given time and that the distribution to the areas will be as follows:

Area I	$28,000,000
Area II	46,000,000
Area III	66,000,000

Progress payments of $90,000,000 are estimated for 1963-64.

EXPENDITURES	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

The following is the detail by organization of support together with the departmental costs of Capital Outlay as discussed in the program budget starting on page 629.

EXECUTIVE

The executive office of the department consists of the director, 3 deputy directors, a special representative, and 4 staff offices—internal audit, legal, public information, and policy and program.

Two additional clerical positions are proposed for 1963-64 to meet workload increases originating from the rapidly expanding water project. $10,000 is provided for consulting services relative to engineering problems.

DIVISION OF ADMINISTRATION

The Division of Administration has responsibility for the functions of fiscal management, personnel management, administrative analysis, general office services, and rental property management.

The Division of Administration plans, organizes, an accomplishes the business management activities of the department and supports the administrative services necessary to accomplish the engineering activities of the department. Incidental thereto is the recommendation of policies which bear on the efficiency, organization, fiscal responsibility, and personnel management of the department, and the development of procedures to carry them out.

Twelve additional positions are provided for added workload in the Comptroller's Branch, the Personnel Management Branch, and the Services and Supply Branch. Additional budget and accounting positions are necessary to meet the increasing fiscal management responsibilities resulting from the expanding water program. The need for additional personnel positions is a result of the intensified recruitment effort that is required to meet program schedules. Additional staff for Service and Supply is required to keep pace with the growth in construction related areas.

ENGINEERING MANAGEMENT

Engineering Management comprises the functions of the Chief Engineer's Office, together with his principal staff advisor's, the Program Control Office and Safety Office, and supervision of dam safety.

The Chief Engineer is the primary engineering officer of the department. He plans, directs, and supervises the technical and engineering activities of the department; develops and recommends policies concerning these activities; and reviews and recommends action regarding all engineering work and related technical work of the department.

The Program Control Office establishes, maintains, and supervises the operation of a uniform system of control of engineering programs in order (a) provide the Director and Chief Engineer with positive management control of the initiation, scope, and execution, of line programs, and (b) to insure full co-ordination of program schedules, work authorizations, and work orders.

The Safety Office is staff to the Chief Engineer and responsible for assuring that the department's activities are carried on safely, including dealing with safety problems encountered during both the design and construction phases of the State Water Facilities.

The Supervision of Safety of Dams Office has responsibility for supervising design, construction, maintenance, repairs, alterations, and operation of all dams in the State, above a certain minimum size and capacity, except those owned by the Federal Government to the extent necessary for the safety of life and property. The staff will review plans for dam construction prepared by the department in the same manner as plans prepared by outside agencies.

Three additional positions are provided for the Program Control Office to cope with the scheduling problems resulting from the increasing water program. One position is added to the Safety Office to provide a chief safety engineer to co-ordinate the overall safety activities of the department. A junior engineering position in the Safety Office is needed to handle increased workload. One additional engineering position and an administrative assistant are required for staff assistance to the chief engineer. One clerical position is added for Supervision of Dams workload.

DIVISION OF RESOURCES PLANNING

The Division of Resources Planning provides staff services to the Chief Engineer in all phases of water resources planning. In addition, it has the line responsibility for studies of statewide scope that cannot be assigned to area branches, for applied research programs conducted by the department, and for Federal-State co-operative programs of a planning nature. The division exercises staff responsibility for all area branch activities relating to (1) collection of basic water-related data, (2) maintenance of current inventories of water resources, utilization, and requirements, (3) planning of water resources development to best meet the needs of the people, and (4) certain statutory services in the interest of public health and welfare.

Two additional positions are included for 1962-63 for increased water rights management activities in connection with the State Water Project.

Two engineers, 2 economists and 1 clerk are included for 1963-64 to carry out a technical methods development program.

Two engineers, 1 research writer and 1 land and water use analyst are included for workload in reports administration. Ten engineers, 1 geologist and 1 clerk are included for increased work in the areas of water requirements and project staging, applied nuclear and saline water conversion, management of water rights, crustal strain and fault movement investigations, state water facilities, and for the preparation of a planning manual. The 2 positions for water rights management are continuations of the 2 positions established administratively in the current year for this purpose.

Two clerks and 1 man-year of temporary help are included for general increases in clerical workload while $19,500 (2.5 man-years) is provided for consulting services directed to improving techniques of economic analysis.

One supervising engineer position is abolished in 1963-64 in the Division Engineer's Office.

DIVISION OF OPERATIONS

The Division of Operations is the organization responsible for the establishment of standards and criteria for operation and maintenance of the State Water Facilities and flood control projects; the physical operation and maintenance of State Water Facilities and flood control projects under the jurisdiction of the department; negotiation of water and power contracts and all other contracts necessary for project operation and for obtaining of reimbursement for all project services; the administration of watermaster service throughout the State; and for providing staff assistance to the chief engineer, branches, and other units of the department in matters relating to operation and maintenance of project facilities; the functioning of the flood operations center; and for the co-ordination and implementation of the Federal-State river forecast center.

Proposed new positions include the following: 1 assistant and 1 junior civil engineer for the statewide power and water operations center to be activated near the end of fiscal year 1962-63; 1 assistant electrical engineer for the operations control system program; 1 dispatcher for the increase in communications workload; 1 associate electric utility, 1 assistant electrical and 1 junior electrical engineer for the accelerated power contracts negotiations and analysis program; 1 associate electric utilities and 1 assistant electrical engineer for development of operation and maintenance manuals and 2 associate electric utilities engineers and 1 assistant electric utilities engineer for new studies in the expanding project power development program; 1 senior and 1 associate business development specialists for the project repayment and financial analysis program; 1 assistant civil engineer and 1 engineering aid II for flood control oriented programs; and 1 intermediate stenographer, 2 intermediate typist-clerks and 4.5 man-years of temporary help for general increases in clerical workload.

TECHNICAL SERVICES OFFICE

The Technical Services Office provides professional, consulting, and technical services to all divisions, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the programs, and include:

1. Engineering Laboratories—Statewide laboratory standards, and testing in concrete, soils, chemical, fluid mechanics, and corrosion.
2. Geologic Services—Geotechnics, and subsurface exploration.
3. Graphic Services—Statewide drafting standards, displays and exhibits, reproduction, and photographic services.
4. Mapping and Surveying—Statewide mapping co-ordination, aerial photo control, special instrument crews, photogrammetry, and planimetry services.
5. Electronic Data Processing and Programming—Programming and electronic computer and data processing operations.
6. Mobile Equipment Management—Acquisition, accountability, and maintenance of heavy equipment, trailers, mobile power units.

Ten additional positions are proposed for 1962-63 for the Electronic Data Processing and Programming Branch reflecting increased demands for machine services by the line organization.

In 1963-64, 45.5 new positions are required to provide the necessary services for the expanding California Water Development program. Areas of increase involve:

A. 1 clerk for the Administrative Office;
B. 4 drillers and a clerk for the Subsurface Exploration Branch;
C. 1 clerk for Graphic Services;
D. 1 clerk for the Photographic Laboratory;
E. 1 machinist for the Laboratory Maintenance Shop;
F. 1 senior engineer for the Corrosion Laboratory;
G. 1 clerk and 1 blueprinter for the Reproduction Unit;
H. 1 delineator for drafting and statewide standards;
I. 10 positions for the Mobile Equipment Branch;
J. Continuation of the 10 current-year positions and 8 additional positions for the Electronic Data Processing and Programming Branch;
K. 3 engineering aids for the Soils Laboratory; and
L. 1.5 man-years of temporary help.

All of the above positions are financed in whole from charges to the department programs.

6.6 positions are abolished in the budget year on the basis of workload readjustments.

DIVISION OF DESIGN AND CONSTRUCTION

The Division of Design and Construction has responsibility for design, construction, and acquisition of state water projects, and standardization of all design and construction work on a department-wide basis, including review of technical adequacy of work in specialized areas. The division also has responsibility for the design and supervision of construction of hydraulic structures for other state agencies.

Increases in permanent personnel, temporary help and consulting services are due to requirements for executing the water development program as outlined in the program budget.

37.2 positions are abolished as a result of workload readjustments in 1963-64. 103.9 positions were established in 1962-63 for workload.

The following new positions are provided for 1963-64:

In the Program Liaison and Control Office, three positions are included to provide for the organization of a critical-path unit to improve program scheduling.

In the Administrative Services Office, seven clerical positions are included to provide administrative services due to increased staffing of additional construction project offices and additional increases in Sacramento.

In the Staff Engineering Branch, 4 positions are included to provide necessary personnel to complete independent review of plans and to prepare standard manuals and handbooks.

In the Specification Office, one position is included to prepare specifications and review proposed contract changes.

In the Relocation Design Section, 27 positions are included to provide additional design personnel necessary for the design of facilities to be relocated in connection with the California Aqueduct construction.

In the Structural Design Section, 25 positions are included to provide additional personnel required for the design of structures required for the California Aqueduct and Oroville Division, Feather River Facilities.

In the Mechanical and Electrical Design Section, 10 positions are included to provide increased personnel for the design of pumping plants and power plants for South Bay Aqueduct, Del Valle Division, California Aqueduct, North San Joaquin and South San Joaquin Divisions.

In the Aqueduct Design Branch, 11 positions are included to provide additional clerical and drafting services and additional engineering personnel for final designs on the California Aqueduct.

In the Real Estate Branch, sixteen positions are included to provide additional personnel required to accelerate property acquisition program for California Aqueduct.

In the construction area, 415.5 positions are included to provide personnel and related supporting administrative and maintenance personnel necessary for the construction inspection for Oroville Division, Upper Feather Division, North and South San Joaquin Division, and increased construction activities on the South Bay Aqueduct.

Of the preceding, 103.9 positions are continuations of the positions administratively established in the current year.

[a] Not paid through Water Resources Revolving Fund in 1961-62.

Department of Water Resources

WATER RESOURCES REVOLVING FUND—Continued

AREA MANAGEMENT

Area Management includes the Assistant Chief Engineer, the area branches, and the Southern District Office. The Assistant Chief Engineer plans, directs, and supervises the work of the area branches and the Southern District Office. The branches and the district office carry out most of the planning and operational activities of the department. In addition, the Southern District Office has initial responsibility for the design, right-of-way, and construction work in the southern part of the State.

The branches and the district are generally organized to manage the department's programs based on natural hydrographic boundaries. This organization facilitates the administration of the department's many investigations, data collection programs, and other activities to emphasize the varying needs of the different areas of the State.

Three additional positions are included in 1962-63 for the Delta Branch for the Operations Section workload. Two land and water use positions are included in 1962-63 for the San Joaquin Valley Branch for a west side crop adaptability study and 3 recreation planners are included for preacquisition recreation planning. Twenty additional positions are included for the Southern District in 1962-63 primarily in the area of design and construction.

Five recreation planner positions are abolished in 1963-64 due to the transfer of postacquisition recreation development in connection with water projects to the Department of Parks and Recreation. Two positions show as actual abolishments and the 3 positions set up in the current year for preacquisition recreation development do not appear as new for 1963-64. For 1963-64 the following new positions are proposed:

A. Assistant chief engineer's office: 1 clerical position for administrative workload.
B. Northern Branch: 4.3 positions for water requirements and project staging, administration of local assistance and water quality programs.
C. Bay Area Branch: 16.3 positions for the Delta-Suisun Bay pollution study and south bay aqueduct operations.
D. Delta Branch: 23 positions for the Delta Water Project, Feather River Basin advanced planning, and Delta fish and wildlife protection studies.
E. San Joaquin Valley Branch: 9.3 positions for the San Joaquin Valley drainage investigation, accelerated contract negotiations and the Madera area investigation.
F. Southern District: 44 new positions and 12 man-years of temporary help primarily for design and construction activities in connection with the California Water Development Program.

Twenty-eight positions are being abolished in 1963-64 due to workload readjustments.

---

[a] Expenditures of $1,155,285 in fiscal year 1962-63 and $1,354,130 in fiscal year 1963-64 reflected as operating expenses in proper organizational units in fiscal years 1962-63 and 1963-64.

[b] The expenditures in this part of the budget are reconciled to the expenditures in the program budget through the reserve accounts. The amounts for 1962-63 and 1963-64 reflect the difference between expenditures for mobile equipment in the revolving fund budget which through the pool concept are charged to the using programs over a period of years to cover the cost of replacement.

[c] Reimbursements are not shown in the revolving fund budget detail.

[d] Differs from program budget by $382,226 resulting from portion of 1960-61 retirement and bond issuance expense being charged by Controller against 1961-62 fiscal year.

GENERAL ANALYSIS

This revolving fund was created by Chapter 1551, Statutes of 1949, to provide loans to districts and municipalities for sewage and drainage facilities. This fund consists of $1,000,000 appropriated thereto plus interest payments on loans.

Allocations are made to municipalities and districts upon approval of the State Water Pollution Control Board and the Director of Finance. Allocation for a loan to the King Salmon County Sanitation District is pending in the current year.

STATE FACILITIES FINANCED BY LOANS FROM TREASURY FUNDS

EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

STATE PUBLIC WORKS BOARD FACILITIES

The State Building Construction Act of 1955 provides that the State Public Works Board may issue revenue bonds or certificates to provide funds to acquire or construct state public buildings when authorized by a separate act or appropriation of the Legislature. By definition "public building" includes automobile parking lots. The facilities so acquired or constructed are to be leased by state agencies at a rental rate that will retire the bonds or certificates and provide for the payment of interest. In addition the rental rates shall cover the costs of operation and maintenance of the public buildings authorized.

The State Public Works Board has entered into an agreement with the Board of Administration of the State Employees' Retirement System whereby that agency will purchase certificates to finance the construction of the 9 office buildings and the Los Angeles garage authorized by Chapter 1687, Statutes of 1955, as amended by Chapter 1647, Statutes of 1957, and by various subsequent budget act items. The Budget Act of 1962, Items 425 and 425.7 authorized the acquistion of land under the provisions of this legislation for parking facilities in the City of San Diego and the City of Sacramento. It is anticipated that certificates for the latter two projects will be purchased out of the School Land Fund.

In 1961 construction began on the Sacramento and San Diego buildings. Sites have been acquired for buildings in San Bernardino, San Jose, and Stockton.

Anticipated completion dates are as follows:

San Diego	April 1963
Sacramento	May 1964
San Jose	July 1965
Stockton	June 1965
San Bernardino	August 1967

The capital outlay program of the Department of Finance (page 811) proposes construction of two major structures in the Sacramento complex. Both of these facilities are proposed for financing under the provisions of the State Building Construction Act of 1955. The budget requests working drawing funds for a general purpose office building as well as working drawings for a new facility to house the Supreme Court.

EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

HIGHWAY PATROL ACADEMY
AND
CIVIL DEFENSE HEADQUARTERS BUILDING, SACRAMENTO

(School Land Fund)

Funds were loaned for the construction of the Civil Defense Headquarters and the Highway Patrol Academy from the School Land Fund under the provisions of Chapter 1597, Statutes of 1951. Under a contract between the Governor, Director of Finance, and the Commissioner of the California Highway Patrol, the costs of these facilities are being repaid with interest at 2½ percent per annum by the respective agencies in 240 equal monthly installments.

OFFICE BUILDING, SACRAMENTO

(Department of Agriculture Building Fund)

The Department of Agriculture Building was authorized by Chapter 11, Statutes of 1950 (First Extraordinary Session). Moneys were transferred from the Department of Agriculture Fund to the Department of Agriculture Building Fund on a loan basis to provide for construction of the building. Rentals are being paid to the Department of Agriculture Building Fund and returned to the Department of Agriculture Fund.

Construction of an addition to this building and the departmental greenhouse will be completed in the 1962-63 fiscal year.

Construct addition to Department of Agriculture Building [a]	$449,500	$164,200	–

---

[a] Financed by loans from trust and other funds and not included in overall budget totals.

STATE FACILITIES FINANCED BY LOANS FROM TREASURY FUNDS—Continued

HIGHWAY PATROL OFFICE BUILDING, SACRAMENTO

(School Land Fund)

Pursuant to the authority contained in Chapter 11, Statutes of 1951, a loan was made available to the Department of the California Highway Patrol from the School Land Fund for the construction of a new office building in Sacramento.

The loan is being repaid in a series of 240 monthly payments together with interest at the rate of 2½ percent per annum on the unpaid balance. Provision for these payments is made in the support budget of the Department of California Highway Patrol.

DEPARTMENT OF MOTOR VEHICLES OFFICE BUILDING, SACRAMENTO

(School Land Fund)

Pursuant to the authority contained in Chapter 12, Statutes of 1951, a loan was made available to the Department of Motor Vehicles from the School Land Fund for the construction of a new office building in Sacramento.

The loan is being repaid in a series of 240 monthly payments together with interest at the rate of 2½ percent per annum on the unpaid balance. Provision for these payments is made in the support budget of the Department of Motor Vehicles.

BUSINESS AND PROFESSIONS BUILDING ANNEX, SACRAMENTO

(Various Funds)

Constructed by advances from special funds and the General Fund in accordance with Sections 400 to 404 of the Business and Professions Code. For detail of repayment program see budget for Departmental Administration, Department of Professional and Vocational Standards.

OFFICE BUILDING, SACRAMENTO

(Veterans' Farm and Home Building Fund of 1943) [b]

This office building, constructed under the provisions of the Veterans Affairs Construction Fund Act of 1943, was completed in March 1957. Occupying agencies, including the Department of Veterans Affairs, will pay rent sufficient to repay the amount advanced by the Veterans' Farm and Home Building Fund of 1943, together with interest thereon.

An appropriation for acquisition and improvement of a parking lot was included in the Budget Act of 1956, subject to the provisions of the Veterans Affairs Construction Fund Act. The parking lot with a capacity of 153 automobiles was put into operation during the month of June 1958. Additional property was purchased to increase the capacity of the parking lot by approximately one-third.

OFFICE BUILDING, SACRAMENTO

(Unemployment Compensation Disability Fund)

Investment of money from the Disability Fund was authorized by Chapter 1603, Statutes of 1951, for the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment as a central office in Sacramento. Expenditures will be repaid through rental payments by occupying agencies.

Investment of money from the Disability Fund was authorized by Chapter 1814, Statutes of 1955, for the acquisition and development of a parking lot adjacent to the new central office building. Expenditures will be repaid through charges to persons using the parking lot.

OFFICE BUILDING, LOS ANGELES

(Unemployment Compensation Disability Fund)

Investment of money from the Disability Fund was authorized by Chapter 16, Statutes of 1954 (First Extraordinary Session) for the acquisition of real property and the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment as a branch office in Los Angeles. Expenditures will be repaid through rental payments by the occupying agency.

PARKING LOT, SACRAMENTO

(State Employees' Retirement Fund)

Investment of money from the State Retirement Fund was authorized by Chapter 760, Statutes of 1959, for the purchase of real property and the cost of improvements thereon. The Retirement Board is presently in the process of acquiring a block contiguous to the Sacramento Retirement Building which is being constructed under the State Building Construction Act of 1955. This block will be developed as a parking lot for lease to the Department of Finance. Employee parking fees would reimburse the fund for its investment with interest.

GENERAL ANALYSIS

Objectives

The purpose of the San Francisco Port Authority is to promote the facilities and administer the operations of the Port of San Francisco, including the State Belt Line Railroad.

Program and Performance

The authority, established under the provisions of Section 1700 of the Harbors and Navigation Code, consists of 5 commissioners appointed by the Governor with the consent of the Senate. Each commissioner serves a 4-year term. One commissioner, elected by the other commissioners, serves as president of the authority.

This agency provides pier services for ships, assigns berths, rents office and wharf space, manages the Foreign Trade Zone, constructs and maintains harbor facilities, operates a railroad, solicits cargo, and publicizes the harbor. Users of port facilities pay tolls, dockage, demurrage, and rental charges set by the authority. The operation of the port is entirely self-supporting.

The harbor is publicized through press releases, publications, and advertising. Port traffic representatives solicit cargo for the port in California and a full-time regional representative promotes harbor business in New York and on the East Coast.

Department of Public Works

TOLL BRIDGE CONSTRUCTION AND REVENUE FUNDS

Toll bridge construction funds consist of proceeds from sale of revenue bonds, the issuance of which is authorized by the California Toll Bridge Authority; and, as in the case of the San Pedro-Terminal Island Bridge, such other funds as are provided by statute. Such funds are expended for construction, reconstruction or improvements of toll bridges in accordance with the applicable bond resolutions and/or statutes.

Toll revenue funds consist of toll collections, rents, roadway service collections and interest on investments. Such funds are expended for operating expenses, for debt service, and for improvements not financed by construction funds.

The physical maintenance of all toll bridges is financed from the State Highway Fund pursuant to Section 188.3 of the Streets and Highways Code.

All toll crossings, other than the San Pedro-Terminal Island Bridge, are situated in the San Francisco Bay area.

San Francisco-Oakland Bay Bridge:

Although currently there are no outstanding bonds against the revenues on this structure, tolls are being continued to pay for the cost of alterations and improvements to the bridge authorized by Chapter 2316, Statutes of 1957, and the rehabilitation and improvement of the San Mateo-Hayward Bridge and the Dumbarton Bridge pursuant to Chapter 1784, Statutes of 1959.

In addition to the toll revenues on the San Francisco-Oakland Bay Bridge, the residue of bond proceeds, in separate funds designated as the San Francisco-Oakland Bay Bridge Construction Fund and Southern Crossing Engineering Fund, are being used respectively for improvements to the San Francisco-Oakland Bay Bridge and for studies of additional crossings.

Carquinez Strait Bridges:

The Carquinez Strait Bridges comprise the two Carquinez bridges and the Benicia-Martinez Bridge, and are operated as a unit.

Construction of the additional Carquinez Bridge and improvement of the original bridge were financed by the issuance of $46,000,000 of toll revenue bonds pursuant to a resolution of the California Toll Bridge Authority dated October 4, 1955. Construction of the Benicia-Martinez Bridge was financed by the issuance of $34,000,000 of toll revenue bonds pursuant to a supplemental resolution of the Authority dated April 23, 1959. Construction has been completed and the bridges opened to traffic but certain right-of-way and contract obligations are still outstanding.

San Pedro-Terminal Island Bridge:

Chapter 74 Statutes of 1958, as amended by Chapter 1961 Statutes of 1959 (Sections 30680-30684 of Streeets and Highways Code) authorized the construction of this bridge and provided for the financing thereof. Toll revenue bonds amounting to $5,000,000 were sold pursuant to resolution of the California Toll Bridge Authority dated February 28, 1961 and $16,400,000 was advanced from the Highway Users Tax Fund and the State Highway Fund, as authorized by the statute. Construction is under way and it is anticipated the bridge will be opened to traffic in October 1963.

GENERAL ANALYSIS

Objectives

This program provides residential facilities for state college students, both single and married.

Program and Performance

State College Dormitory Revenue Fund:

In 1957 the Legislature approved an additional residence hall program to be financed partially by a loan from the Federal Housing and Home Finance Agency and the remainder from the State Construction Program Fund. All expenditures for construction were from appropriations from the State Construction Program Fund. During 1960-61, $14,173,000 principal amount of bonds, authorized under the State College Revenue Bond Act of 1947, were sold. The proceeds from the sale of these bonds were deposited in the State College Dormitory Construction Fund and $14,107,266 transferred to the State Construction Program Fund for reimbursement of construction advances.

The program provides capacity for 7,809 single students at the several state college campuses. Construction was completed on 15 units which began operation in September 1959. Construction of the remaining 21 units was completed and the units occupied in September 1960. All revenues accruing through the operation of the residence halls will be deposited in the State College Dormitory Revenue Fund. An operating reserve of 12.5 percent of current estimated expenditures has been provided for 1962-63 and 1963-64.

Moneys in this fund are appropriated to pay the costs of operation and maintenance of the residence halls. After providing for current support expenditures, remaining sums, as required, shall be transferred to the State College Dormitory Interest and Redemption Fund for interest and principal payments on the outstanding bonds. Remaining balances in any of these funds after payment of all authorized charges shall remain available for expenses incidental to the program.

This budget reflects an increase of $54 in the dormitory fee. The room rate charge for the 1962-63 fiscal year was $270 per academic year. The new rate is $324. The increase is necessary because the net revenues are not sufficient to finance the necessary operating expenses and to service the bonds outstanding. The primary cause for the increased operating costs are the salary increases and additional personnel necessary to the efficient operation of the dormitories. The new rate will adequately cover deficits and provide a small reserve for increased operating costs in future years.

The 36 units will provide student housing capacity as follows:

College	Men	Women	Total
Chico State College	208	208	416
Fresno State College	209	418	627
Humboldt State College	202	202	404
Long Beach State College	209	209	418
Sacramento State College	204	408	612
San Diego State College	627	418	1,045
San Fernando Valley State College	–	207	207
San Francisco State College	404	404	808
San Jose State College	606	606	1,212
California State Polytechnic College:			
San Luis Obispo campus	808	404	1,212
Kellogg-Voorhis campus	636	212	848
Totals	4,113	3,696	7,809

Each dormitory consists of two 3-story wings with each wing containing 104 beds except at San Francisco where two 6-story wings with 202 beds per wing are provided.

College Auxiliary Enterprise Fund:

During the fall of 1946 the Federal Public Housing Administration provided temporary housing facilities for veteran students at Chico, Fresno, Humboldt, San Francisco, and San Jose State Colleges. These facilities were operated by the various colleges by agreement with the FPHA from 1946 until October 31, 1948, at which time title to all facilities was transferred to the State by Public Law 796 of the Eightieth Congress, and their operations were financed through the General Fund support appropriation of the individual colleges as an interim measure. This program at Fresno State College was phased out in 1959.

On August 1, 1949, Chapter 1485, Statutes of 1949, established the College Auxiliary Enterprise Fund, to which was transferred the excess of income over expenditures for prior operations. All rents, charges and fees are paid into this fund and are appropriated therefrom for maintenance, repairs, and operation of student housing facilities. Funds may also be expended for construction. These facilities provide housing for veterans or other students at established rates. The facilities operated by the College Auxiliary Enterprise Fund are listed below:

College	Family Dwelling Units	Dormitory Units	
Chico State College	45	15	(30 individuals)
Humboldt State College	10	37	(37 individuals)
San Francisco State College	84	–	
San Jose State College	148	–	
Totals	287	52	

This budget reflects some changes in existing facilities due to the removal of some units due to age and condition and to make room for construction of permanent instructional facilities.

GENERAL ANALYSIS

The California State Compensation Insurance Fund is a self-supporting enterprise created to offer insurance protection to employers at the lowest possible cost. This fund operates in competition with other insurance carriers, acting as a yardstick for the securing of fair premium rates for employers and fair treatment for injured employees. The fund is required by law to use the same rates and classifications established by the State Insurance Commissioner for insurers generally, and provides that the rates shall be only those sufficient to carry out the specific purposes stated in law.

Expenditure estimates are predicated on the expectation of a continued increase in population growth and business activity. Changes in economic conditions may result in corresponding changes in the various items of expense.

GENERAL ANALYSIS

Objectives

This division assists eligible veterans in the acquisition of a farm or home. It is a self-sustaining activity not supported by funds derived from taxation.

Program and Performance

Within limitations defined by the law, the department may purchase a farm or home and in turn enter into a contract with the veteran for the sale of the property to the veteran. The cost to the department cannot exceed $15,000 in the case of a home or $40,000 in the case of a farm. The contract with the veteran provides for monthly payments which include interest currently computed at 3.75 percent and is usually written for a term of 20 years. Seventeen district offices have been established throughout the State to process applications for assistance under this program.

Property purchases by the department for resale to veterans are currently at a rate of approximately 1,000 per month. This rate is expected to continue through the 1963-64 fiscal year. Past year purchases were at an average rate of 1,250 per month.

From 1922 to June 30, 1962, 195,630 properties have been acquired for resale to veterans at contract values totaling $1,910,946,000. To June 30, 1962, 65,060 contracts have been paid in full.

The Home Protection Plan of life insurance was started on December 1, 1938. Each veteran who is insurable is covered for the exact amount of the unpaid balance of his contract at a cost of 45 cents per month per $1,000 insurance. Effective February 1, 1960, these additional insurance benefits were added: If insured under the plan, the applicant is eligible for additional insurance which provides for a cash payment to the spouse or other designated beneficiary of an amount equal to 20 percent of the unpaid balance of the purchase contract at the date of death. If death occurs by accidental means before age 70, an additional cash payment equal to 120 percent of the contract balance, but not to exceed $18,000, is made to the beneficiary. Coverage for these additional benefits is automatically extended to each contract purchaser who is insured under the plan, unless the veteran notifies the department in writing that he does not desire this coverage. The premium was originally set at $1 per month per $1,000, but favorable experience permitted a gradual reduction to the present cost.

As of June 30, 1962, 3,327 insured contract holders have died and $16,572,662 has been paid in full settlement of balances due. This insurance provided family protection which generally would not otherwise be carried. In addition to life insurance, insurance against fire and other hazards is required, the coverage being under a blanket policy. The rate is 40 cents on a $100 deductible policy, 62 cents on full coverage, and 80 cents on farm out-buildings, for a term of 5 years.

The 1963-64 Budget is based on the assumption that funds for farm and home purchases will continue at the current level of availability. The increased expenditures for bond interest reflect the cumulative effect of the growth of the loan program. This expenditure is more than offset by revenues received.

A total of 19 positions are abolished in the 1962-63 and 1963-64 fiscal years in partial recognition of a reduction in workload requirements. A classification and organization study is now being undertaken to more adequately reflect changes in type and volume of workload.

RETIREMENT FUNDS

JUDGES' RETIREMENT FUND

The Judges Retirement Fund receives contributions from the State in the amount of 4 percent of the salaries for the established judgships of the justices of the Supreme Court and of the district courts of appeal, and judges of the superior and municipal courts. A like amount is deducted from the salaries of the justices and judges and deposited in the fund. It is anticipated that there will be 612 members contributing to this retirement fund effective July 1, 1963.

FUND CONDITION	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64

TEACHERS' RETIREMENT FUND

The State Teachers' Retirement System is composed of approximately 280,035 active accounts. Approximately 27,364 members will receive retirement benefits during 1963-64. The present system became operative July 1, 1944.

Three major funds constitute the State Teachers' Retirement Fund. They are the Teachers' Permanent Fund, the Retirement Annuity Fund, and the Annuity Deposit Fund. Chapter 1583, Statutes of 1957, authorized the 3 funds to be combined for administrative purposes only. All other aspects of each fund are carried on as before.

The Teachers' Permanent Fund receives its revenue from members' contributions, contributions from the school district, interest from invested reserves, and yearly appropriations by the State from the General Fund. Retirement benefits from the fund are currently $600 per year to the person who is credited with 30 or more years of service, and who retires at age 60. A pro rata amount of that amount is paid for less than 30 years of service, and all benefits from this fund are usually discounted or improved actuarially if the member retires at an age less than 60 years or over.

The Retirement Annuity Fund receives its revenue from the members' contributions, interest from invested reserves, and yearly appropriations by the State from the General Fund. Under Chapter 1395, Statutes of 1955, school districts and employing state agencies are required to pay contributions equal to 3 percent of the certificated payroll to this fund. The retirement benefits from this fund are computed on the basis of the member's sex, total service, age at retirement, and the average salary earnable in the 3 highest consecutive years of earnings. Subventions are made to local retirement systems in lieu of State Teachers' Retirement System benefits to local members on the basis of service credited by the local systems, and the amount of local fund allowances.

The Annuity Deposit Fund consists of members' annuity deposits made between July 1, 1935, and July 1, 1944, together with the interest earned thereon. Chapter 1395, Statutes of 1956, has reopened this fund for additional member contributions. Members who have contributed to this fund receive an annuity at the time of their retirement, but the benefit is based solely on the value of the members' accumulated contributions.

STATE EMPLOYEES' RETIREMENT FUND

The State Employees' Retirement System receives contributions from the State, contracting public agencies, and employee members to be used for payments of death and retirement benefits in accordance with provisions of law and contracts with public agencies. Included in 1961-62 are funds collected from state employees electing to integrate social security with the state employees retirement system program. The $10 per electee is available to meet integration costs during 1961-62 and 1962-63.

[a] Includes approximately $39,000,000 as an amount paid to the Federal Government for retroactive OASDI contributions in the 1961-62 fiscal year.

RETIREMENT FUNDS—Continued

STATE EMPLOYEES' CONTINGENCY RESERVE FUND

The State Employees' Retirement System receives contributions from the State to be used for payment of the administrative expenses of the Meyer-Geddes State Employees' Medical and Hospital Care Act and maintains a contingency reserve for the same program. In accordance with Section 22826, Government Code, an amount not to exceed 2 percent of the total of the contributions made by the employee or annuitant, and the State on behalf of the employee or annuitant can be assessed the employer for meeting administrative expense and no more than 3 percent for maintaining the contingency reserve.

GENERAL ANALYSIS

The Department of Employment administers the state public employment service, unemployment insurance and disability insurance systems. The department also performs certain functions as an agent of the Federal Government in connection with the administration of other programs.

The public employment service program offers to all workers and employers the advantages of a central point in the community at which job seekers and employers can have ready access to the largest and most centralized job demand and labor supply listing in the community. This job placement service includes a variety of supporting services which provide for:

1. Continuous assessment of the characteristics of the shifting labor market and current information on labor demand and supply needs.
2. Recording, appraising, and classifying the qualifications of workers.
3. Special job placement, counseling, and testing services to worker groups in the community work force who are given statutory preference—i.e., veterans— or who are disadvantaged by such factors as age or race.
4. Special services to employers designed to cut costs of recruitment, screening, training, and turnover, and to contribute to the solution of other in-plant staffing problems related to the selection and assignment of workers.
5. Assistance to community groups in making "skills of the work force" and "industrial development" studies and otherwise stimulating community action to solve problems which tend to deter achievement of maximum and stable employment in the community.

The public employment service is usually one of a number of organized facilities in the community assisting in the hiring process. Its services are available to all workers and employers whenever, in the public interest, a needed and productive placement service can be provided.

The unemployment insurance program provides for payment of benefits to workers who are unemployed through no fault of their own; and who are able to, available for, and actively seeking work, and meet the other eligibility requirements of the Unemployment Insurance Code. These benefit payments are made from the Unemployment Trust Fund which is financed through a payroll tax on employers who are subject to the provisions of the California Unemployment Insurance Code. In the 1959 Session of the Legislature, Part III was added to the Unemployment Insurance Code to provide for extended duration benefits during periods when unemployment reaches a 6 percent level. These extended duration benefits are financed by an additional tax on all employers. Estimates of extended duration benefits and additional tax amounts are included as expenditure and revenue items for the appropriate fiscal years.

The Unemployment Insurance Code provides for payment of disability and hospital benefits in two ways—either by the State from the Unemployment Compensation Disability Fund, financed by a 1 percent tax on wages paid by workers in employment subject to provisions of the California Unemployment Insurance Code—or by voluntary plans as provided by the code.

Chapter 2155, Statutes of 1961 provides for disability and hospital benefits coverage to agricultural employees. Since the coverage became effective on October 1, 1961, approximately 385,000 agricultural employees have been provided coverage. Approximately 65,000 agricultural employers are reporting wages as provided by the code. The addition of this program has increased the agency administrative costs during the 1962-63 and 1963-64 fiscal years. The enactment of Chapter 2154, Statutes of 1961 increased the maximum weekly disability benefit amount, increased the taxable wage base for employee contributions, and re-established the adverse selection provisions related to voluntary plans.

In the field of unemployment, the agency acts as an agent of the Federal Government in administering other programs such as:

1. Unemployment insurance benefits for unemployed federal workers and unemployed exservicemen.
2. The Manpower Development and Training Act from the standpoint of identifying training needs, selecting and referring applicants, paying training allowances and subsistence, and travel allowances when appropriate, and placing the trained worker.
3. Similar responsibilities are assigned the department in connection with the Area Redevelopment Act. Federal funds are provided to finance extensive occupational training and retraining programs and for subsistence payments to those undergoing training.
4. The Temporary Extended Unemployment Compensation Act of 1961 provided payment of benefits to unemployed persons for extended periods when regular benefit entitlements were exhausted. This program expired on June 30, 1962. However, the Department of Employment will perform work in closing out the program, particularly in the Appeals and Overpayment and Fraud functions.

The number and complexity of the programs administered by the Department of Employment have required the agency to adopt and utilize the most modern methods of budgetary and financial control.

The Department of Employment uses a performance system of budgeting under which personnel requirements are determined through workload projections multiplied by unit time requirements. These unit costs are developed from a system of functional time reporting in which all employees of the Department of Employment participate. The workload data for the Disability Insurance and Unemployment Insurance programs which were used as a basis for this request are shown in the following table:

---

a Expenditures from Department of Employment Contingent Fund included in overall budget totals. For Statement of Fund Condition see page 810.

1961-62 Fiscal Year

During the 1961-62 fiscal year the number of state plan disability claims filed increased 11.6 percent over the 1960-61 fiscal year and 12.4 percent over the previous 1959-60 fiscal year. In 1961-62 improved performance permitted a decrease in cost per unit of work.

Unemployment insurance benefit workloads decreased from the 1960-61 levels. Weeks claimed decreased 13.45 percent from 13,382,319 to 11,582,966. Other key workloads experienced similar decrease in volume.

The public employment service made major reorganizational changes to further expand services to employers and work applicant groups. Fourteen new employment service offices were established in the major metropolitan areas; job placement and job counseling service to the handicapped, veterans, youth and older workers, parolees, and other groups requiring special assistance showed substantial workload increase over previous fiscal years. During 1961-62 a record total of 737,166 job placements was made.

1962-63 Fiscal Year

Disability insurance administration budgetary requirements are established on a performance basis with the total staff determined from workload—unit time calculations. For the 1962-63 fiscal year it is anticipated that the principal workload items of state plan disability claims will be 13.8 percent higher than actual experience for the 1961-62 fiscal year. In addition there will be increased workloads in connection with the enactment of Chapter 2155, Statutes of 1961, which provided for the extension of disability and hospital benefits coverage to agricultural employees and became effective October 1, 1961. It is anticipated that 244,900 employer reports will be processed, containing 2,800,000 disability insurance wage items.

Employment in 1962-63 is expected to increase at a more rapid rate than it did in 1961-62 as California industries continue to expand. The largest percent gains in employment will probably occur in those industries most closely related to population growth, namely services, finance-insurance-real estate, and government. A large gain is expected in manufacturing, especially in the defense related industries of electronics and missiles. Construction, public utilities, and trade will experience smaller percentage gains from their 1961-62 levels. Despite large gains in employment and generally good business conditions in 1962-63, unemployment will not return to the low levels experienced during the years immediately following the Korean War. In 1961-62 unemployment averaged 6.3 percent of the labor force, falling from a very high level at the beginning of the period to a relatively low point at the end of the year. Experience in 1962-63 should prove to be somewhat the reverse with unemployment at a relatively low level at the beginning of the period and rising slightly in the last half of the year. The unemployment rate, however, should average about 6.2 percent for the year.

The temporary unemployment extended compensation program terminated as of June 30, 1962. During 1962-63 the phasing activities to completely close out the program will require 45 position equivalents to process appeals and overpayments and to investigate potential fraudulent claims.

1963-64 Fiscal Year

For the 1963-64 fiscal year, it is anticipated that the principal workload item of state plan disability claims will increase 13.7 percent over the number of claims that was estimated for the 1962-63 fiscal year. Part of this anticipated increase is attributable to disability and hospital benefits coverage for agricultural employees which estimates a volume of 299,200 subject employer reports, containing 2,800,000 wage items. The estimated volume of employer reports is 22.2 percent higher than the estimate for 1962-63. The staffing estimates for the disability insurance program are based upon this increased workload multiplied by unit time used for the 1962-63 operating budget.

A reduction in federal income taxes, recommended by the President as a means of stimulating consumer demand and business investment, may be enacted in the 1963-64 fiscal year. This should enable employment growth in the state to equal or exceed the rate of growth in the prior fiscal year in most industries. Unemployment rates are expected to decline on a seasonally adjusted basis throughout the fiscal year. Nonetheless, the increasing number of new entrants to the labor force coupled with continued technological advance, increased efficiency in many industries and the absence of any significant backlog of unsatisfied demand for goods and services will result in an estimated unemployment rate for the year slightly below the level of the past two fiscal years, with improvement anticipated in the last part of the fiscal year.

The amount included for support from the Department of Employment Contingent Fund for the 1963-64 fiscal year includes the following principal items:

1. A recurring amount for partial cost of operating the community employment program. This program involves work with local communities in the promotion and development of employment programs and with individual employers in the development of new industrial projects. The other part of the amount required for the support of this program is paid from federal funds.
2. An amount of $196.357 for costs to the Unemployment Insurance-Employment Service program for all of the additions to the administrative pro rata charges that were added by Chapter 1844, Statutes of 1959, except charges for the Central Records Depository of the Secretary of State. This amount consists of $183,317 for cost of the Legislature and $13,040 for the indirect imputed costs of the Central Fiscal Agencies for rent and Attorney General services. The Federal Bureau of Employment Security has advised this agency that granted funds cannot be expended for the cost of the Legislature or the indirect imputed charges of the Central Fiscal Agencies.

This budget provides $75,000 from the Contingent Fund for the expenses of the Commission on Automation and Technological Developments. Proposed legislation will be introduced at the 1963 General Session for the authorization of this commission.

Also, provision is made for interest payments in the amount of $26,700 on a loan to the Unemployment Compensation Disability Fund. It is estimated that in April 1964 (a low month for revenue receipts) that the cash position of the fund will require a temporary loan. The interest payment is based on a 30-day loan of $8 million at 4 percent interest per annum.

DEPARTMENT OF EMPLOYMENT—Continued

OFFICE OF THE DIRECTOR AND DEPUTY DIRECTOR

The Department of Employment is administered by the Director of Employment appointed by the Governor subject to approval of the Senate. He is responsible for all phases of the administration of the California Unemployment Insurance Code except for certain quasi-judicial functions which are the responsibilities of the Appeals Board. Two deputy directors are appointed by the Governor. One assists the director in the administration of the code and acts for the director in his absence and the other is responsible for the farm placement program.

An increase of 1 exempt administrative assistant position is temporarily approved in 1962-63 and is proposed on a permanent basis in 1963-64. This position will be used primarily to establish and maintain liaison with outside groups—unions, business, agriculture, and the insurance industry—who are vitally concerned with the operation of the disability insurance program. It will also be used to investigate and study the effect of proposed and actual changes in this program brought about by legislative and administrative actions from the standpoint of acceptance of and compliance with the changes by these groups.

GOVERNOR'S ADVISORY COUNCIL

The Advisory Council, composed of 7 nonsalaried members appointed by the Governor representing employers, labor, and the public, acts in an advisory capacity to the Director of Employment on matters relating to the administration of Unemployment Insurance Code.

An increase of 1 executive secretary position is temporarily approved in 1962-63 and proposed on a permanent basis in 1963-64. This position is needed for performance of administrative functions such as selecting matters to be placed on the agenda for the Advisory Council meetings, preparing the semiannual report for the Governor, keeping the Chairman and Advisory Council members informed of matters pertinent to the business of the Advisory Council, and preparing special studies and reports as directed. The position has been authorized in prior years but was discontinued in 1961-62 in lieu of a secretary II position.

LEGAL SECTION

This section advises on legal problems; drafts legislation and regulations; and represents the department in specified actions before the Appeals Board, the State Personnel Board, the Industrial Accident Commission, and in court.

An additional position is temporarily approved in 1962-63 and proposed on a permanent basis in 1963-64 to handle the increased stenographic and clerical activities and for work in the files and law library.

RESEARCH AND STATISTICS SECTION

This section compiles the departmental statistical reports, carries out analytical research in connection with the employment security and disability insurance programs administered by the department, is responsible for the farm reporting program, makes estimates of the workload of the department for use in preparing departmental budgets, and provides statistical and research services to the operating divisions of the department.

A total of 8 positions are temporarily approved during 1962-63 and are included on a permanent basis in 1963-64. An assistant chief is needed to provide necessary planning and management assistance to the section chief for the proper development of new program requirements. Four research positions and 1 clerical position are needed to perform necessary staff work in the Manpower Development Training Act Program. One research position is needed to develop specific standards of farm prevailing wage surveys in support of wage findings under Public Law 78, and 1 research position is needed to provide necessary staff work in the Disability Insurance Adverse Selection activities.

INVESTIGATION SECTION

This section makes investigations throughout the State of violations of the Unemployment Insurance Code; investigates criminal violations of other laws where such violatons affect the proper administration of the Unemployment Insurance Code; and prepares evidence, files criminal complaints, and assists prosecuting attorneys in the presentation of evidence. Fifteen positions are reduced in 1962-63 to adjust to the allowance granted by the Federal Bureau of Employment Security.

DIVISION OF APPEALS

Objectives

The 3 members of the California Unemployment Insurance Appeals Board are appointed by the Governor for terms of 4 years and constitute the final administrative body, vested by law with the responsibility of reviewing and deciding appealed matters relating to disputed unemployment insurance and disability benefit determinations, and employer tax liability. The Appeals Board also hears appeals from rules and regulations established by the director.

Program and Performance

The Appeals Board formulates administrative policy and through its secretary and chief referee administers the affairs of the division. Referee offices have been established in San Francisco, Sacramento, Los Angeles, Van Nuys, Fresno, Oakland, San Jose, San Bernardino, San Diego, and Long Beach. The referees staffing these offices have the primary responsibility of hearing and deciding appeals from determinations relating to unemployment insurance benefits, disability benefits, overpayments, and disputed employer tax liability matters. During 1962-63 35.2 positions are temporarily approved to meet increased workload.

In 1963-64 a total of 25.2 additional positions is proposed for the following purposes:

An increase of 1 position is anticipated in the Appeals Board due to the estimated increase in the higher authority benefit appeals workload. An increase of 24.2 positions is anticipated in the Area Referee Section due to the estimated increase in the lower authority benefit appeals workload.

DIVISION OF PUBLIC EMPLOYMENT OFFICES AND BENEFIT PAYMENTS

Objectives

This division administers and operates the Unemployment Insurance and Employment Service Programs.

Program and Performance

The program of the division is carried out at 3 levels, the central office, the area offices, and the local and farm labor field offices.

At the central office level are located the office of the Chief of the Division; the Organization and Management Section; Employment Service, Benefit Payments, and Farm Placement Technical Sections; the Interstate Unit; the Emergency Planning Unit; and the Manpower Development and Training Payment Unit.

The Organization and Management Section makes special studies to determine conformity of local offices with prescribed policies, standards, and methods of operation, and is responsible for planning of space and personnel needs and determination of the need for and development of procedures and standards in the general field of organization and management of the division. The technical sections provide program leadership and interpret and recommend policy. The Interstate Unit processes interstate unemployment insurance claims for payment. The Emergency Planning Unit plans with sections and divisions involved for emergency operations of the department in case of natural or man made disaster. This unit was established March 1, 1960, and is financed through grants allocated through the United States Department of Labor by the Office of Civil and Defense Mobilization for use of all state employment security agencies in making effective the National Manpower plan.

The Occupational Analysis Field Center is located in Los Angeles but is under the direct supervision of the central office. It is 1 of 5 such centers in the United States and serves as the point of analysis and processing of job analysis data gained by state employment security agencies in 11 western states.

The coastal, interior, southern, and Los Angeles metropolitan area offices direct the operation of local employment service and unemployment insurance offices and farm placement field offices. These area offices also assist in determining program needs and formulating plans to meet these needs.

Local offices provide services to the public in placement, testing and counseling, labor market information, and payment of unemployment insurance benefits. They also provide the farm labor service where there are no separate farm labor offices. Separate farm labor offices in many localities provide service to the public in the placement of farm workers and preparation of farm labor market reports.

In 1963-64 a total of 446 additional positions is included for the following purposes:

An increase of 3 positions is proposed in the Organization and Management Section. One position of these is needed to coordinate activities of the Management Planning Unit and the Field Operations Planning Unit. In addition this position will assist in developing long-range plans for the organization of the Employment Service in the metropolitan areas. Two positions are needed to perform studies requested by the Bureau of Employment Security to accomplish the reorganization of Los Angeles downtown offices and the organization of the balance of Los Angeles County. From these studies more realistic plans will be developed to provide services.

An increase of 6 positions is anticipated in the Employment Service Technical Section. Three of these positions are needed to provide for organizational changes in this section required to improve the supervisory structure through lessening of the spans of supervision. Two positions are needed to cope with the increased workload in this Department's Employment Counseling Program. One position is needed to provide a coordinator in the development, production and use of Employment Service promotional materials.

An increase of 2 positions is anticipated in the Occupational Analysis Field Center. The positions will prepare occupational analysis training materials needed to further develop the techniques and methods for an effective Manpower Program.

One position is proposed in the Farm Placement Technical Section to develop and supervise programs to increase and improve use of resident and domestic workers and youth in farmwork.

One position is proposed in the Los Angeles Metropolitan Area Office to provide consultant services to Program Director of Youth Opportunities Board of Greater Los Angeles.

An increase of 421 positions is anticipated in the Local and Farm Placement Offices Section. Three hundred of these positions are requested for the further expansion and improvement of the Employment Service Program. One hundred positions are needed for increase in Manpower Development and Training Program activities. Twenty-one positions are required as a result of estimated increases in benefit workloads.

In the Benefit Payments Technical Section 12 positions are temporarily approved during 1962-63 and are proposed new in 1963-64. Through strengthening of staff services, it is anticipated that operations in the local offices can be improved. Through these positions significant policy and procedural improvements can be made improving the quality of the work and reducing administrative costs.

DIVISION OF ACCOUNTS AND TAX COLLECTIONS

Objectives

The Division of Accounts and Tax Collections is responsible for the proper reporting of wages and payment of contributions under the California Unemployment Insurance Code.

Program and Performance

The deputy director is the chief of this division. The division consists of an Auditing Section staff in central office and field offices under the direction of the chief tax administrator.

The Auditing Section carries out the uniform statewide tax auditing, compliance, enforcement, and collection program of the department directly with the taxpayers concerned. The section determines whether employing units are required to register and report, whether services are covered under the law, and whether wages are taxable. The section also determines and verifies reported and unreported tax liability, collects delinquent amounts due, provides related advisory services, and assures compliance with relevant provisions of the California Unemployment Insurance Code.

In 1963-64 a total of 29.7 additional positions is proposed for the following purposes:

An increase of 3.5 and 26.2 positions is proposed in the Central Office and Field Auditing Sections respectively. Twenty and seven tenths of these positions are requested as a continuation from Fiscal Year 1962-63 and are needed to accomplish increased field audit workload. Nine new positions are proposed for 1963-64 and are needed for increased workload in the agricultural coverage phase of the Disability Insurance Program as related to an estimated increase in the number of agricultural employers.

OFFICE OF ASSISTANT DIRECTOR—COMPTROLLER

Objectives

The assistant director-comptroller advises the director and deputy director on fiscal and administrative matters and directs the Standards and Methods, Accounting, Data Processing, and Administrative Services Sections, and the Internal Audit Unit.

Program and Performance

The Standards and Methods Section perform a continuous review of the department's organization and the co-ordination of programs, policies and procedures. It evaluates present and future efficiency and effectiveness of existing policies, methods and organizations. It keeps informed on all problems which require planning, seeks to develop adequate solutions, and follows up results of planning activities. It also maintains the central archives and policy files of the department.

The Accounting Section processes employer status records and contribution and earnings reports; receives and deposits remittances; maintains employer reporting and accounting controls and reserve accounts records; reconciles the bank accounts of the various benefit programs; maintains employer and wage earner report files; recomputes insurance awards; adjusts insurance account balances; maintains fraud and overpayment records; and maintains accounts and processes documents relating to unemployment insurance and disability insurance overpayments.

The Data Processing Section using electronic data equipment establishes and maintains claim and wage record files; records and computes benefit awards; records employee and employer contributions; prepares related statistical reports; and assists in relevant fiscal operations.

Administrative Service activities are carried on at 2 levels; in Central Office and in the Business Management Offices. Activities included are the Training Section which plans and directs the departmental training program; the Personnel Section which plans and implements the personnel management activities; the Fiscal Section which handles budgetary and fiscal affairs and provides services such as typing, transcription, duplicating, and mail control; and the Property Section which is responsible for premises procurement, proper space utilization and real property acquisition. The Coastal, Interior, and Southern Business Management Offices perform field work in the fiscal, personnel, property, and other administrative services functions and maintain rosters of field office employees. The Internal Audit Unit reviews, analyzes, and reports on financial operations and related records in field offices and central office.

In 1963-64 a total of 36.8 additional positions is proposed for the following purposes:

An increase of 1 position is included in the Office of Assistant Director-Comptroller. This position is needed for internal audit work on Central Office problems of potential fraud in benefit payment and tax operations.

An increase of 1 position is requested in the Standards and Methods Section. This position is needed for added workload due to expansion of the Unemployment Insurance and Employment Service Programs.

An increase of 1 position is proposed in the Data Processing Section. This position is needed to augment the section administration. The position will provide needed administrative and technical direction to the programmer staff, in addition to strengthening the overall sectional administration.

An increase of 15.7 positions is anticipated in the Business Management Offices. Eight and seven-tenths of these positions are requested as a continuation of positions temporarily approved in 1962-63 and are needed for added workload in Fiscal, Personnel and Office Service activities due to field staff expansion caused by expansion of programs. Additional space requirements, maintenance of space and revised inventory procedures require additional professional personnel. Seven new positions are to establish a separate Business Management Office for the Santa Ana area. The continued growth of California's employment service program necessitates the provision of appropriate business service being attached as closely as possible to the field administrators. At present, a branch office of the Los Angeles Business Management Office is being operated in Santa Ana. Service requirements because of program expansion and field office reorganization substantiate a full functioning business management operation in Santa Ana.

An increase of 3 positions is proposed in the Training Section. These positions are needed because of expansion of agency staff, new programs and added emphasis in the employment service activity.

An increase of 1 position is requested in the Property Section. This position is needed because of increased leasing requirements due to expansion of program activities and splitting of local office program activities under the departmental reorganization plan.

An increase of 2.1 positions is proposed in the Personnel Section. These positions are needed to perform added workload in personnel activities due to increases in total agency staff because of program expansion and program emphasis.

An increase of 12 positions is anticipated in the Fiscal Section. Nine positions are in Fiscal—General Services and 3 positions are in Fiscal—Office Services. Eight of the 9 positions for Fiscal—General Services are needed to meet additional work requirements resulting from new budgetary and management control procedures; addition of special programs requiring complex accounting and budgetary analysis and control; and to provide sufficient personnel in the typing pool to meet the additional workload generated because of increased program activities. One new accounting officer II position is proposed for 1963-64 to serve as assistant to the accounting officer. In the past several years many new programs have been added requiring close, almost day-to-day, attention to the special fiscal requirements of each program. The assistant position will provide the appropriate administrative attention.

DIVISION OF DISABILITY AND HOSPITAL BENEFITS

Objectives

The Division of Disability and Hospital Benefits is responsible for the administration of the disability insurance program.

Program and Performance

The Central Office operation develops plans, standards and procedures and evaluates all disability insurance claim operations.

The Claim Control Section provides claims service for the disability district offices; processes voluntary plan claim reports; supervises all voluntary plan activities for conformity with requirements of the California Unemployment Insurance Code; and maintains voluntary plan files.

The disability district offices, within assigned geographical districts, evaluate first claims under state coverage for disability insurance to determine if they meet minimum standards; determine eligibility of claimants for disability insurance; prepare and issue disability insurance payments to eligible claimants; maintain all claim records for disability insurance claimants; conduct a field visit program which includes unscheduled visits to residence of claimants and visits to employers to review installation of voluntary plans for conformity with the California Unemployment Insurance Code; and process and answer all correspondence with employers, claimants, doctors, institutions, and other state or government agencies.

The medical director formulates medical policies, programs, and standards for the disability insurance program of the department. Offices are maintained in Sacramento, Los Angeles, and San Francisco. He also advises the personnel office on medical problems concerning employees of the department.

In 1963-64 a total of 10 additional positions is proposed for the following purposes:

An increase of 8 positions is anticipated in the Claim Control Section. These positions are needed to accomplish estimated increase in Disability Insurance Benefit Workload as related to voluntary plan coverage. Ten positions are temporarily approved for this purpose in 1962-63. In addition an administrative officer and related clerk are proposed in both years to distribute the divisional workload from 3 to 4 areas of responsibility. This will bring this division into organizational alignment with the rest of the department.

A total of 80.7 positions were abolished from the district offices during 1962-63 because of a decrease in Disability Insurance State Plan Benefit workloads. During 1963-64 a total of 76 of these positions are reestablished to meet anticipated workload.

Unemployment Compensation Disability Fund

EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
For payment of interest on order of the Director of Finance on transfers of money from any other fund, which is subject to investment, to the Unemployment Compensation Disability Fund under Section 3007 of the Unemployment Insurance Code, computed at a rate determined by the Department of Finance to be the rate of interest allowed interest bearing time deposits in banks for a similar period of time	–	–	$26,700	$26,700

COMMISSION ON AUTOMATION AND TECHNOLOGICAL DEVELOPMENTS

Objectives

To provide continuous appraisal of the impact of automation and technological developments on the skills required in the California work force and the job opportunities available to them; and to make known the knowledge and information obtained to labor, management, and the public agencies to be used as a basis for planning programs and actions to develop the skills of California's work force for a changing technology, to deal more effectively with the problems of unemployment, and to further the economic growth and development of the State and the well-being of its people.

Program and Performance

Enabling legislation will be introduced by the administration at the 1963 General Session to provide for this commission. The proposed legislation provides that the commission shall consist of a total of 24 members including 3 Members of the Senate appointed by the Senate Committee on Rules, 3 Members of the Assembly appointed by the Speaker, 13 members appointed by the Governor and 5 ex officio members. In appointing the 13 members, it is planned that the Governor shall appoint 5, who represent management; 5 who represent labor; and 3 who represent the general public. The ex officio members are the Commissioner of the Economic Development Agency and the directors of the following departments: Education, Employment, Industrial Relations, and Social Welfare. The commission shall be charged with the following responsibilities:

1. To survey and study the introduction of modern production techniques in California to determine the impact of automated processes and other technological advancements on employment opportunities; the skill requirements of industry, business, and government; the displacement of employees; and the obsolescence of skills among members of the labor force.
2. To study and analyze the processes of adjustment to automation and other technological advancements in the State's economy.
3. To survey current public and private programs and educational resources in the field of job training, retraining, and skill development to evaluate their effectiveness in providing employable skills in reference to both the changing composition of the State's labor force and the changing skill requirements of industry.
4. To undertake co-ordinated surveys in the various labor markets of the State to project as best possible the basic skill requirements of industry, business, and government sufficiently in advance of need, and in the approximate quantity needed, to the end that such projections shall provide a body of usable information for the development of sound job training, retraining, and skill development programs by labor and management and responsible government agencies.
5. To encourage labor and management to undertake jointly similar surveys and projections within their respective industries and occupations to maintain a high level of private initiative in meeting the skill development requirements of both employees and employers.

This budget provides for the necessary positions and expenses of the commission to carry out its functions during the 1963-64 fiscal year.

---

* Calendar year unless otherwise indicated.

[a] Includes repayment of advances.

[b] Fiscal year from July 1 to June 30.

[c] Information not available. Not required to submit a budget to Department of Finance.

[d] Excludes Los Angeles County Fair.

[e] Excludes Los Angeles County Fair, Cloverdale Citrus Fair, and National Orange Show.

Department of Finance—Fairs and Expositions Division

DISTRICT AND COUNTY AGRICULTURAL FAIRS

GENERAL ANALYSIS

The State of California leads all others in the total amount of financial support given its 78 fairs and expositions which are operated by state agencies or by counties and nonprofit associations receiving moneys from the Fair and Exposition Fund. This fund is made up of revenues received from licensing of parimutuel wagering on horse racing and is distributed by fixed legislative appropriation and on the basis of need.

District agricultural associations are state agencies, created by legislative action, and established for the purpose of holding fairs, expositions and exhibitions of all the industries and industrial enterprises, resources, and products in the State with the purpose of improving, exploiting, encouraging and stimulating such production. Each association is administered by a board of 9 directors appointed by the Governor.

The California State Fair and Exposition is a state institution within the Department of Finance in Sacramento, as is the California Museum of Science and Industry which maintains a permanent exhibit in Los Angeles. Fifty other district agricultural associations conduct district fairs; 24 counties conduct county fairs and 2 nonprofit corporations conduct citrus fruit fairs—the National Orange Show at San Bernardino and the Cloverdale Citrus Fair at Cloverdale. All the agencies conducting those fairs are required to submit annual budgets to the Department of Finance for approval with the exception of the 2 citrus fruit fairs and the Los Angeles County Fair.

The Department of Finance, through its Fairs and Expositions Division, supervises the operations of 73 of the 74 district and county fairs in California which receive financial assistance from the State. The Los Angeles County Fair and the 2 citrus fruit fairs do not come within the jurisdiction of the division.

All-year use of fairgrounds facilities has increased greatly over the past few years as buildings and grounds have been steadily improved. Interim uses include community gatherings, recreational activities, conventions, livestock sales, 4-H and Future Farmers meetings, sports events, school sessions, farm labor camps and relief headquarters in times of disaster.

A 5-year Capital Outlay program for all fairs has been formulated.

Full-time managers are employed by both district and county fairs. Other permanent employees of district agricultural associations have civil service status.

In an effort to improve the fair program the Fairs and Expositions Division co-operates in the conduct of schools of instruction for fair managers and directors; sponsors an annual conference for training of judges who officiate at fairs; holds annual meetings with Future Farmers and 4-H officials and with representatives of breed associations and exhibitors' groups to revise rules and regulations in the master premium list which details amounts that can be paid for the many classes and types of exhibits. These functions and activities are in addition to the fiscal and technical supervision by the Department of Finance over these 73 fairs.

The law does not restrict the area to be served by a district, county, or citrus fruit fair. Some of the fairs attract and encourage exhibitors from all over the State, while the exhibitors at other fairs are limited to the district or county in which the fair is conducted or to such district or county and contiguous areas.

The Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

District Agricultural Associations

Revenues received by the California Museum of Science and Industry, Los Angeles, are deposited in a special fund in the State Treasury and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an allocation under the provisions of Section 92 of the Agricultural Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of $250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of $125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 92 of the Agricultural Code.

The remaining 48 district agricultural associations receive annual allocations under Section 92 of the Agricultural Code on the basis of premiums paid at their respective fairs.

County Agricultural Fairs

The majority of the county fairs are conducted by nonprofit associations acting as agents of the respective boards of supervisors under the provisions of Government Code Section 25905, and receive allocations under the provisions of Section 92 of the Agricultural Code. In a few cases fairs are conducted directly by the county.

The Los Angeles County Fair is conducted under the provisions of Section 25906 of the Government Code. The County of Los Angeles receives an annual appropriation of $250,000 for support of the fair under the provisions of Section 19622 of the Business and Professions Code. The county does not receive an allocation under the provisions of Section 92 of the Agricultural Code.

The remaining 23 counties which receive funds for the encouragement of agricultural fairs receive allocations under the provisions of Section 92 of the Agricultural Code.

Citrus Fruit Fairs

Citrus fruit fairs receive an allocation under the provisions of Section 19626 of the Business and Professions Code.

The National Orange Show, a nonprofit corporation, receives an annual allocation of $150,000 from the 5 percent of the first balance of the Fair and Exposition Fund which is appropriated for the encouragement of citrus fairs under the provisions of Section 19626 of the Business and Professions Code.

The Cloverdale Citrus Fair, a nonprofit corporation, receives an annual allocation of $30,000 from that portion of the 5 percent of the first balance of the Fair and Exposition Fund which exceeds the amount which may be allocated to the National Orange Show under the provisions of Section 19626 of the Business and Professions Code.

Allocation of State Funds

Sections 19622, 19626, 19627, and 19630 of the Business and Professions Code provide that part of the revenue received from parimutuel wagering on horse racing shall be used for the support and encouragement of, and capital outlay at, district and county agricultural fairs and citrus fruit fairs. A statement showing the distribution of the Fair and Exposition Fund appears in the Capital Outlay Section of the budget on page 826.

Section 19622 makes annual appropriations to district and county agricultural fairs as follows:

Support of the Los Angeles County Fair	$250,000
Support of 1-A District Agricultural Association	250,000
Support of 48th District Agricultural Association	125,000

Section 19626 provides that 5 percent, but not more than $180,000 of the balance remaining after deducting certain appropriations shall, subject to statutory limitations, be paid to citrus fruit fairs. Section 19627 provides that 40 percent, but not more than $4,680,000, of the first balance shall, subject to statutory limitations, be apportioned for encouragement of county and district agricultural fairs under the provisions of Section 92 of the Agricultural Code.

Section 19630 of the Business and Professions Code appropriates $2,250,000 annually from the remaining balance of the Fair and Exposition Fund for capital outlay purposes at county, district, and citrus fruit fairs. It is proposed to augment this appropriation in 1963-64 from the savings in the continuing appropriaion made by Section 19627 of the Business and Professions Code. These funds are allocated by the Director of Finance upon approval of the State Public Works Board. The State Fair, the Museum of Science and Industry, the 1-A, and 48th District Agricultural Associations and the Los Angeles County Fair are not eligible to receive allocations from this appropriation.

The funds allocated for the encouragement of district and county agricultural fairs under the provisions of Section 92 of the Agricultural Code and Section 19627 of the Business and Professions Code are apportioned on the basis of premiums paid. The maximum amount which may be apportioned to any one fair during any fiscal year is limited to the amount required on the basis of need as determined by the Department of Finance, but not to exceed $65,000. Funds apportioned under the provisions of Section 92 of the Agricultural Code and Section 19627 of the Business and Professions Code are distributed to the fairs monthly from current revenue paid into the Fair and Exposition Fund.

The fairs which expect to receive allocations under the provisions of Section 92 of the Agricultural Code submit their proposed premium lists for review by the Fairs and Expositions Division before the premium lists are printed. The proposed premium lists are reviewed to determine whether they comply with the master premium list and to determine the suitability of the proposed offerings for the individual fair.

1-A DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Grand National Livestock Exposition and Grand National Junior Livestock Exposition at San Francisco)

GENERAL ANALYSIS

The 1-A District Agricultural Association was organized in 1931, and conducts 2 livestock shows each year at the Cow Palace, located on the boundary of San Francisco and San Mateo Counties. The Grand National Livestock Exposition featuring livestock, a horse show and a rodeo, is conducted in the fall and the Grand National Junior Livestock Exposition for junior exhibitors is conducted in the spring. The 1962 Grand National Livestock Exposition was conducted from October 26th to November 4th. The 1963 dates are October 25th to November 3rd. The 1962 Grand National Junior Livestock Exposition was conducted April 14th to 18th. The 1963 dates are April 6th to 10th. The Cow Palace is used and is well suited for large interim event rentals.

2nd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the San Joaquin County Fair at Stockton)

GENERAL ANALYSIS

The association was formed in 1922 and has sponsored the San Joaquin County Fair since 1936. Prior to that time, the history of the fair is traceable back to 1860. The fairgrounds site consists of 189 acres located in the City of Stockton. The County of San Joaquin gift-deeded approximately 70 acres of this to the State and an extensive grounds improvement and construction program is nearly completed. Racing with pari-mutuel wagering has been a continuing feature of the fair. The 1962 fair was conducted from August 16th to August 25th. Fourteen thousand six hundred forty-five exhibits entered by 1,906 exhibitors were judged at the fair. The 1963 fair dates are August 15th to August 24th.

4th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Fourth District Fair at Petaluma)

GENERAL ANALYSIS

Current activities of the district date from 1936. Annual fairs are conducted at the association's fairgrounds leased from the City of Petaluma under a lease expiring in 1972, at an annual rental of $1. The 1962 fair was conducted from July 12th to July 15th, exhibits being confined to junior departments. Three thousand nine hundred ninety-six exhibits entered by 1,183 4-H Club and Future Farmers of America exhibitors were judged at the fair. The fair dates for 1963 are July 11th to July 14th.

9th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Redwood Acres Fair at Eureka)

GENERAL ANALYSIS

The present association was organized in 1937 and conducts annual fairs on property of approximately 50 acres, known as Redwood Acres, owned by the association and located just outside the City of Eureka. The 1962 fair was conducted June 27th to July 1st. Three thousand six hundred thirty-one exhibits entered by 977 exhibitors were judged at the fair. The dates for the 1963 fair are June 26th to June 30th.

22nd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Southern California Exposition at Del Mar)

GENERAL ANALYSIS

The present activities of the 22nd District Agricultural Association date from 1933. Annual shows are conducted on the association's fairgrounds located at Del Mar consisting of general livestock and other exhibits and a national horse show. In 1936 an agreement was entered into with the Del Mar Turf Club granting a franchise for the purpose of conducting racing meets on association grounds. The rental is based on a percentage of parimutuel wagering during the race meets. In 1954 a subfranchise agreement was entered into between the Del Mar Turf Club and Operating Company, Incorporated, for the conducting of race meetings.

The 1962 fair was conducted from June 29th to July 8th. The 1963 fair is to be held June 28th to July 7th.

30th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Tehama County Fair at Red Bluff)

GENERAL ANALYSIS

The present activities of the association date from 1936. Annual fairs are conducted on the association's fairgrounds, located just outside the City of Red Bluff, leased from the County of Tehama at a rental of $10 per year. In addition, the association owns 8 acres adjacent to the leased property. The lease expires in 1998. The 1962 fair was held August 2nd to August 4th and consisted of general livestock and other exhibits. Six thousand one hundred ninety-one exhibits entered by 1,195 exhibitors were judged at the fair. The 1963 fair dates are August 1st to August 3rd.

33rd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the San Benito County Fair at Hollister)

FUND CONDITION	ACTUAL 1961 CALENDAR YEAR	ESTIMATED 1962 CALENDAR YEAR	PROPOSED 1963 CALENDAR YEAR

GENERAL ANALYSIS

Present activities of the association date from 1937. Annual fairs are conducted on the association's grounds known as Bolado Park located approximately 8 miles from the City of Hollister. San Benito County Saddle Horse Show and Fair is also conducted on these grounds. The 1962 fair was held from October 5th to October 7th and consisted of general livestock and other exhibits. The rather large nonfair revenues and expenditures as shown below are due to the fact that the association operates, on a year-round basis, a swimming pool, picni area, barbecue area, and other facilities. Three thousand nin hundred seventy exhibits entered by 789 exhibitors were judge at the 1962 fair. The 1963 fair is to be held October 4th t October 6th. This fair charges no admission to the grounds.

45th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the California Midwinter Fair at Imperial)

FUND CONDITION	ACTUAL 1960-61	ACTUAL 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

The association was organized in 1921. No information on activities is available prior to 1930. Annual fairs are conducted on association fairgrounds located in the City of Imperial and leased from the County of Imperial at an annual rental of $5. The lease expires in 1987. The 1962 fair was conducted from March 3rd to March 11th. Four thousand seven hundred eighteen exhibits entered by 1,541 exhibitors were judged at the fair. The 1963 fair dates are March 1st to March 10th. In view of the fact that fairs are held early in the year, the association has adopted a fiscal year ending June 30th for accounting purposes.

48th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Great Western Livestock Show and Great Western Dairy Show at Los Angeles)

GENERAL ANALYSIS

The association was organized in 1935. Annual fairs are held on the association's property located in the central manufacturing district of the City of Commerce. The Great Western Dairy Show, featuring dairy animals and dairy products, is conducted in the late spring of each year. The Great Western Livestock Show, featuring breeding and fat market animals, is conducted in the late fall. In 1962 the Great Western Dairy Show was held May 25th through the 30th and the Great Western Livestock Show November 14th through the 20th. The dates for the 1963 shows are May 14th through June 2nd for the Great Western Dairy Show and November 20th through 26th for the Great Western Livestock Show.

52nd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Sacramento County Fair at Sacramento)

GENERAL ANALYSIS

The association was formed in 1948 pursuant to amendments to the Agricultural Code passed in 1947. The association succeeded to the activities of the Sacramento County Fair held at the City of Galt on county fairgrounds since 1937. Since 1954, fairs have been conducted on the grounds of the California State Fair due to abandonment of association grounds in Galt. Starting in 1960, the district co-sponsors the Spring Fair with the California State Fair and Exposition. The 1962 fair was conducted May 12th to May 20th. Four thousand five hundred thirty-two exhibits entered by 1,301 exhibitors were judged at the fair. The 1963 fair dates are May 11th to May 19th.

BUTTE COUNTY FAIR

(Conducting the Butte County Fair at Gridley)

GENERAL ANALYSIS

Sponsorship of the fair by the County of Butte dates from 1938. Early fairs were held by the Paradise Fair and Apple Show Association at Paradise, California. Since 1940, fairs have been held at Gridley on the county's fairgrounds by the Butte County Fair Association under agreement with the board of supervisors under the provisions of Section 25905, Government Code. The 1962 fair was conducted from August 23rd to August 26th and consisted of general livestock and other exhibits. Six thousand nine hundred ninety-nine exhibits entered by 724 exhibitors were judged at the fair. The 1963 fair dates are August 22nd to August 25th.

HUMBOLDT COUNTY FAIR

(Conducting the Humboldt County Fair at Ferndale)

GENERAL ANALYSIS

The fair is held under the direction of the board of supervisors who appoint directors to manage the operation of the fair. In the past, these directors have been men from the membership of the Humboldt County Fair Association, an organization founded in 1897 and which has assisted or conducted county fairs each year since that time with the exception of the war-years period. Annual fairs are conducted at the county fairgrounds located in the City of Ferndale. The 1962 fair was conducted from August 13th to August 19th and featured general livestock and other exhibits with particular emphasis on dairy cattle and sheep. Four thousand seven hundred fifty exhibits entered by 1,074 exhibitors were judged at the fair. The 1963 fair dates are August 12th to August 18th. For many years a feature of the show has been horse racing and parimutuel wagering.

LOS ANGELES COUNTY FAIR

(Conducting the Los Angeles County Fair at Pomona)

GENERAL ANALYSIS

The fair is conducted by the Los Angeles County Fair Association under an agreement with Los Angeles County under the provision of Government Code, Section 25906. The Los Angeles County Fair Association was incorporated as a nonprofit corporation in 1940 and succeeded to the Los Angeles County Fair, a nonprofit stock corporation, at that time. Los Angeles County receives allocations for conducting the fair under the provisions of Section 19622 of the Business and Professions Code and under its agreement with the Los Angeles County Fair Association, reimburses the association for expenditures to the extent of the state appropriations. The Department of Finance does not have any jurisdiction over the activities of the fair other than annual audit examinations by the Audits Division of the department. The 1962 fair was conducted from September 14th to September 30th. The 1963 fair dates are September 13th to 29th.

PLUMAS COUNTY FAIR

(Conducting the Plumas County Fair at Quincy)

GENERAL ANALYSIS

The present activities of the fair date from 1940. Annual fairs are held by the Plumas County Fair Association under a contract with the board of supervisors under provisions of Government Code, Section 25905, on county fairgrounds partially owned by the county and partially leased from the United States Forest Service under a lease expiring in 1965, located just outside the City of Quincy. The 1962 fair was conducted from August 8th to August 12th and consisted of general livestock and other exhibits. Three thousand seven hundred thirty-seven exhibits entered by 922 exhibitors were judged at the fair. The 1963 fair dates are August 7th to August 11th.

There is no charge for admission, but the county contribution is partially based on the actual attendance during the fair.

SAN MATEO COUNTY FAIR

(Conducting the San Mateo County Fair and Floral Fiesta at San Mateo)

GENERAL ANALYSIS

Sponsorship of the fair by the County of San Mateo dates from 1929. Annual fairs are held on county fairgrounds located just north of Bay Meadows race track, San Mateo, by the San Mateo County Fair Association under a contract with the board of supervisors under the provisions of Section 25905, Government Code. In the past, annual fairs have featured floricultural and agricultural exhibits and some junior livestock exhibits. A particular feature has been a horse racing meeting conducted on Bay Meadows race track under a contract with the California Jockey Club. The 1962 fair was conducted from August 3rd to August 11th. Three thousand eight hundred forty-eight exhibits entered by 1,533 exhibitors were judged at the fair. The 1963 fair dates are August 2nd to August 10th.

SOLANO COUNTY FAIR

(Conducting the Solano County Fair at Vallejo)

GENERAL ANALYSIS

Activities of the fair date from January 1946, although no allocations were received by the association under Section 92 of the Agricultural Code until 1950. Annual fairs are conducted on approximately 150 acres of land north of the City of Vallejo by the Solano County Fair Association under agreements with the board of supervisors under the provisions of Section 25905 of the Government Code. A particular feature of the fair has been a race meeting with parimutuel betting. The 1962 fair was held from June 20th to June 30th and consisted of general livestock and other exhibits. Four thousand two hundred eighty exhibits entered by 780 exhibitors were judged at the fair. The 1963 fair dates are June 19th to June 29th.

TRINITY COUNTY FAIR

(Conducting the Trinity County Fair at Hayfork)

GENERAL ANALYSIS

Annual fairs are conducted on the county fairgrounds located at the City of Hayfork by an executive committee appointed by the county board of supervisors. The County of Trinity has executed a 4-year lease with the Trinity County High School District to use part of the fair facilities for a high school during the school term. The 1962 fair was conducted from August 17th to August 19th and consisted of livestock and other exhibits. Five thousand five hundred forty-eight exhibits entered by 943 exhibitors were judged at the fair. The 1963 fair dates are August 16th to August 18th.

CLOVERDALE CITRUS FAIR

(Conducting the Cloverdale Citrus Fair at Cloverdale)

FUND CONDITION	ACTUAL 1960-61	ACTUAL 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

This fair receives an annual state allocation under Section 19626 of the Business and Professions Code, the first such allocation being made in 1945. The Cloverdale Citrus Fair was incorporated as a nonprofit organization in 1951, prior fairs having been conducted by the Cloverdale Chamber of Commerce. Operations of the Cloverdale Citrus Fair do not come under the supervision of the Department of Finance other than through audit examinations conducted by the Audits Division of the department. Annual shows, featuring citrus displays, are conducted in the association's pavilion located in the City of Cloverdale. The 1962 show was held from February 23rd to February 25th. The 1963 dates are February 21st to 24th.

NATIONAL ORANGE SHOW

(Conducting the National Orange Show at San Bernardino)

GENERAL ANALYSIS

The National Orange Show was incorporated in 1922 and is a continuation of a nonprofit association with some modifications formed in 1910. It appears that the early history of citrus fairs in San Bernardino can be traced back to 1879. The association receives an allocation under the provisions of Section 19626 of the Business and Professions Code but does not come under the jurisdiction of the Government Code or other codes pertaining to state organizations, its actions being governed by the Corporations Code. The only jurisdiction the Department of Finance has of the activities of the association pertains to an annual audit to determine that the appropriations have been used for the general purposes provided by the statutes. Under the provisions of Section 94.6 of the Agricultural Code the National Orange Show is required to file with the Department of Finance by January 20th each year, a statement of operations in the previous calendar year. Annual fairs are conducted by the association on grounds owned by the association and located in the City of San Bernardino. The 1962 show was held from April 15th to April 25th. The 1963 show dates are March 14th to March 24th.

FUND CONDITION	ACTUAL 1960-61	ACTUAL 1961-62	PROPOSED 1962-63
Balances at Beginning of Year:

Authorized Positions

Salaries and Wages

INTRODUCTION

Presented in this supplement to the budget document proper are the complete and detailed data on approved staffing for all state agencies. This information has been published in a separate volume to (1) reduce the quantity of detail in the budget document and thereby focus attention on the programs and activities of the several state agencies; (2) simplify the mechanics of budget preparation and printing; and (3) consolidate information on number and classification of positions, pay rates, and salary and wage expenditures.

For each state agency the information outlined above is reported for the 1961-62 fiscal year on an actual basis and for 1962-63 and 1963-64 on an authorized basis. A more thorough explanation of the content and interpretation of this supplement is given below and on the immediately following pages.

Position Titles

In this volume, positions encompassed by state civil service have been listed by the official class titles as established by the Personnel Board. Positions exempt from civil service have been listed by the official class titles established by (1) statute, (2) The Regents of the University of California, (3) The Trustees of the California State Colleges, or (4) such other authority as may have been designated by law.

Authorized Positions

For the 1962-63 and 1963-64 fiscal years, positions reported as *authorized* are those which were included in the 1962-63 Budget as approved by the Legislature. Exceptions to this rule are explained by footnote in all cases other than technical adjustments of position classification to more accurately reflect assigned duties.

In some instances, certain classes have been combined to provide replacement of positions at a higher level either (a) upon completion of a training period or (b) after temporary downward classification for recruiting purposes. Such positions are indicated by showing both class titles on the same line, with a salary range of the minimum salary of the lower class and the maximum of the higher class. Examples: (a) administrative trainee-junior staff analyst, $440–590, (b) junior-intermediate clerk, $298–419.

Expenditures

Estimated salary payments for each group of like positions are reported for the 1962-63 and 1963-64 fiscal years. These estimates represent salary costs on the basis of continuous, 100 percent occupancy of all authorized positions and include the cost of merit salary adjustments where applicable. Exceptions are explained by footnote for those special cases in which the above general rule was not followed. Appropriate adjustments to recognize probable position vacancies are included in the budget document as *Estimated salary savings*. For the 1961-62 fiscal year *actual* salary expenditures are reported for each budget function.

Number of Positions

For the 1961-62 fiscal year, the number of positions represents actual man-years (A man-year is equal to 12 months full-time employment of one person—12 persons employed for one month, two persons employed for six months, or any similar combination equal one man-year.) of employment expressed in terms of full-time, full-year equivalents counted to the nearest tenth of a man-year.

Positions for 1962-63 and 1963-64 are counted to the nearest tenth of authorized jobs expressed in terms of full-time, full-year equivalents. The only exception is in the case of positions to be established after July 1. In such instances, the positions are counted without adjustment for delayed establishment, e.g., a full-time position to be established January 1 is counted as 1.0 position, not as 0.5 position.

As in the case of expenditures, appropriate adjustments are included in the budget document to reduce authorized positions for 1962-63 and 1963-64 to anticipated available manpower.

Salary Range

Rates of pay listed under this heading represent salary ranges established by (1) the State Personnel Board for civil service and maritime academy classifications; (2) the appointing authority with the approval of the Director of Finance for certain exempt positions; (3) statute; (4) The Regents of the University of California; or (5) The Trustees of the California State Colleges.

The amounts shown are the (1) minimum and maximum monthly or hourly rates, (2) flat monthly rate, or (3) annual compensation as fixed by competent authority. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate payable to an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than $10. This plan is used also for most salaries fixed for exempt positions. A table of salary ranges in the state service is included at the end of this section. Thus, $298–362 indicates a monthly salary range having steps of $298–$313–$329–$345–$362. Salary ranges for instructional positions in the state colleges and in other state agencies are set forth on page 4.

Salary ranges for academic positions in the University of California are set forth on page 5.

*Schedule of Salary Ranges in Use in the State Service **

Range No.	Steps				
21a.	$271	$284	$298	$313	$329

Salary Schedule for Instructional Positions—State Colleges

(Based Upon Salaries Effective July 1, 1962)

RANK [a]	ACADEMIC		VOCATIONAL
	CLASS I [b]	CLASS II [c]	
Assistant	$5,148– 5,688	–	–
Instructor	5,976– 7,260	$6,276– 7,608	–
Junior instructor [d]	5,976– 7,260	6,276– 7,608	$5,976– 7,260
Assistant professor	6,576– 7,992	6,912– 8,400	–
Intermediate instructor [d]	6,576– 7,992	6,912– 8,400	6,576– 7,992
Associate professor	7,992– 9,720	8,400–10,188	–
Senior instructor [d]	7,992– 9,720	8,400–10,188	8,400–10,188
Professor	10,188–12,396	10,692–13,020	–
Principal instructor [d]	10,188–12,396	10,692–13,020	10,692–13,020

[a] The maximum percentages for the academic ranks for professor, principal instructor, principal vocational instructor and associate professor, senior instructor, senior vocational instructor will not exceed 60 percent of the total number of all faculty members having academic rank.

[b] Persons whose minimum academic or professional preparation is equivalent to a college degree.

[c] Persons whose minimum academic or professional preparation is equivalent to a doctor's degree.

[d] Instructors and vocational instructors receive, in addition to the above schedule, three steps, or approximately 15 percent, if employed for 12 months instead of the normal 10-month teaching period.

Salary Schedule for Librarians—State Colleges

	RANGE
Library assistant I	$4,788 to $5,832
Library assistant II	5,280 to 6,432
Librarian I	5,400 to 5,976 [a]
Librarian II	5,976 to 7,992 [b]
Librarian III	$6,576 to $8,400 [c]
Librarian IV	7,992 to 9,720
Librarian V	8,820 to 10,692
College librarian	12,396 to 15,060 [b]

[a] Three-step range

[b] Seven-step range

[c] Six-step range

Salary Schedules for Instructional Positions—Other State Agencies

(Ranges and Criteria of Application for Teachers)

Range	Steps				
A	$536	$562	$590	$619	$650
B	562	590	619	650	683
C	590	619	650	683	717
D	619	650	683	717	753
E	650	683	717	753	790
F	683	717	753	790	829

CRITERIA FOR RANGE DETERMINATION	ACADEMIC (Preparation)	VOCATIONAL (Preparation)
Range A	Provisional or special credential, without bachelor's degree.	—
Range B	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential.	—
Range C	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 12 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential.	Three years experience as journeyman craftsman.
Range D	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 24 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential. Or regular general secondary credential.	Qualification for special secondary Vocational Class A Credential in T and I and PS Education.
Ranges E and F	Used only for "incentive increases" when a teacher receiving less than Range F completes at least six units in college level courses approved by his department and taken after appointment. He shall then be entitled to advance to the corresponding step in the next higher salary range for the class, and such an advance shall be known as an "incentive increase."

Librarian V	9,948 to 12,696						
Bio.-medical librarian	9,948 to 12,696						
Assistant university librarian[e]	9,948 to 12,696						
Assistant university librarian[f]	11,520 to 13,992						

---

* Interim step. Those with full research rank who were at Step 3 during 1961-62 were increased to the interim step July 1, 1962, and will remain at that level until advanced to Step 4.

** Designation of specialty completes classification title.

[a] Usual salary period is 1 year.

[b] Usual salary period is 2 years.

[c] Usual salary period is 3 years.

[d] Usual salary period is not specified.

[e] Except Berkeley and Los Angeles.

[f] Salary for Berkeley and Los Angeles only.

Merit Salary Adjustments

Subject to availability of funds, Section 18854 of the Government Code provides that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in a position provided the employing agency certifies to the Personnel Board that the employee's job performance meets the level of quality and quantity expected by the agency considering the employee's experience in the position.

All employees in salary ranges with a maximum step of $399 and below and who have received permanent appointments may receive an increase from the first step to the second step of their salary range upon completing six months of qualifying service as defined by State Personnel Board rules. In addition, employees in salary ranges with a maximum step of $419 to and including $536 may receive a similar salary adjustment when the predominant recruitment source is from outside state service. This same adjustment may be granted to employees in classes with salary ranges not exceeding $619 where acute recruitment difficulty is experienced.

Except for employees of the University of California, provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions. Inasmuch as turnover of personnel generally results in replacement at a lower step in the salary range, the amount budgeted for salary adjustments opposite each position is offset by a lump sum deduction for downward adjustments included in the deduction for "estimated salary savings."

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

Merit salary adjustments for employees of the University of California and the State Colleges are determined in accordance with rules established by the Regents and the Trustees, respectively.

Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty, or responsibility of the work.
3. Conditions of work in the class.
4. The adequacy of existing appropriations which may be used for salary increase purposes.

The rates of pay of casually employed trades workers and printing trade employees in the state service are established at the hourly wage rates negotiated by unions with private employers in the county in which they are employed. These employees receive all the collateral benefits of premium pay for night work, travel time, and overtime pay provided by private industry. For these two groups, the State also pays the full cost of hospital, surgical and medical insurance benefits for both the employees and their dependents, where such health and welfare benefits are provided by private employers.

Casually employed trades workers working for the State do not receive the same benefits of vacation, sick leave and retirement that permanent state employees receive. However, the State does pay into vacation and retirement funds where such benefits are the prevailing practice in private industry.

Printing trades employees receive all of the benefits enjoyed by other state employees with one exception. Other state employees receive an average of 11 holidays a year. Printing trades employees are provided the eight paid holidays received by their counterparts in private industry.

The salary ranges shown are those in effect on August 2, 1962 unless otherwise indicated. Salaries and wages expenditures for both the 1962-63 and 1963-64 fiscal years reflect these rates of pay. Statutory salaries are provided for at the rates in effect during the 1962-63 fiscal year.

---

[a] Section 22, Article V of the Constitution prohibits change in compensation during term of office. Increase to $21,500 effective January 1963 concurrent with beginning of new term to reflect authorized general increases granted since January 1, 1959.

[b] Election clerks normally decrease in primary election years and increase in general election years.

[a] The 1963-64 fiscal year decrease in man-year count reflects the change from the 120-day General Session of the Legislature to the 30-day Budget Session. The 15 man-year upward revision of current year expenditures over the 1962-63 Governor's Budget estimate of 62 positions reflects the inclusion of 4 janitor positions and 1 printing trades assistant in lieu of services previously provided under contract; the temporary deferment of the abolishment of 9 clerical positions in the accounting function as a result of a reappraisal of current need for electronic data processing manpower; and the addition of 1 position in the planning section to meet clerical workload.

[b] The 1963-64 fiscal year decrease in expenditures reflects the change from the 120-day General Session of the Legislature to the 30-day Budget Session. The man-year count shown in production units of 657.2 man-years for the current year is an estimate based on presently anticipated workload. The revised estimate represents a reduction of 70.4 man-years from the previous published estimate for the 1962-63 fiscal year.

[c] The man-year count shown in production units of 30.8 man-years for the current year is an estimate based on presently anticipated workload. The revised estimate represents a reduction of 13 man-years from the previous published estimate for the 1962-63 fiscal year.

[d] The increased expenditures in the 1963-64 fiscal year reflect increased document distribution following a General Session of the Legislature. The 2.7 positions in the current year over the 15 man year estimate reported in the 1962-63 fiscal year budget were added on a workload basis due to increasing sales activity.

[a] Section 22, Article VI of the Constitution prohibits change in compensation during term of office. Increase to $21,500 effective January 1963, concurrently with beginning of new term to reflect general increases granted since January 1, 1959.

[b] The treasury cashier position is reclassified to assistant deputy state treasurer in order to provide an executive level civil service position to afford a higher degree of continuity to the management structure.

[c] The general accountant III position is reclassified to treasury cashier (revised).

[d] One treasury deposit officer position is reclassified to treasury investment officer.

[e] The governmental auditor II position is reclassified to treasury general services officer.

[f] The treasury bond officer position and 1 assistant treasury officer position are reclassified to assistant treasury officer II.

[a] Information officer I position transferred from Departmental Administration and reclassified to manager III.

[b] Motor vehicle registration assistant position transferred to Deparmental Administration and reclassifiied to business service officer

[c] Sixteen and nine-tenths man-years limited to June 30, 1963.

[d] The position of Comptroller, Departmentof Public Works, and his immediate staff, have had a dual status, functioning both at t departmental and Division of Highways level. In March 1962, the organization was clarified by placing these positions in t Division of Highways and budgeting them accordingly. Fiscal services to other divisions will continue, with reimbursement f costs. Internal auditing will remain a departmental function.
